ALTAFALLS.COM

From the Owners

SINCE 1970

From the Staff of Alta Falls Distributing...

It has been our privilege to serve you for these many years. We have and will always strive to bring you the highest service possible. Thank you from the bottom of our hearts for your continued business. Give us a call with all your questions and needs for Easy Pro Pond Products, Cast Lighting, in-lite Lighting, HPC Fire Products, Warming Trends Fire Products, The Outdoor Plus, The Outdoor Greatroom, Hancock Grills, Blaze Grills, Coyote Grills, Bull Grills, Forno Venezia Pizza Ovens, EZ Finish RTF Kitchens, open-air Outdoor Kitchen Cabinetry, American Fireglass, Typar Geosynthetics, GrassTex Synthetic Turf, and Furrion Outdoor Television. We Look forward to working with you in 2025.

From the Owners of EasyPro Pond Products...

2024 was our team's first year as an employee-owned company. It was an exciting year full of positive changes as every individual in the company embodied increased pride and ownership. The team has been hard at work making sure we are doing everything possible to best serve our customers.

When it comes to purchasing products, we know you have a choice and we appreciate and take pride in being your supplier of choice. We do not take that for granted. Thank you for your business and for putting your trust in us.

2025 is going to be a great year!

Economic predictions are strong and the future is bright. We have lots of new products launching this year that we are excited about and we are excited to share them with you.

Some of these are game-changers for the industry such as Sound Shield for aeration, which drastically reduces the loudness of compressors (page 24), and our innovative approach to Recreational Swim Ponds and Wetland Filtration with our Pit-Viper Diffuser System. Rec Ponds just got a lot less time and labor intensive! See these in our Pond and Water Feature catalog.

We are here to help you in any way you need – let's work together for your best year yet! We wish you all the best for 2025.

Blessings,

Paul Cole, President and CEO

"faith as small as a mustard seed can move mountains"

– Matthew 17:20

IMPORTANT INFORMATION

EasyPro Authorized Distributor and Dealer Program and Enforced MAP Policy

EasyPro has in place one of the strongest and most enforceable Unilateral Distributor and Dealer Authorization Program in the industry in conjunction with an actively enforceable MAP (Minimum Advertised Price) Policy, which allows us to protect the quality and value of the EasyPro Brand.

Authorized supply chain partners are confidently able to profitably capitalize on selling the added value of their services, product knowledge, and warranty services that unauthorized sellers will not be able to provide.

For more details about this program, email us at asp@easypro.com.

Pond & Water Feature Catalog

Alta Falls and EasyPro offer a large selection of pond and water feature products. See our ever-expanding selection of garden fountains, pond and waterfall pumps, pond kits, waterfall/stream kits, aeration systems, compressors, water treatments and so much more!

We have a separate catalog devoted to ponds and water features for pond and water garden enthusiasts.

Contact us via phone or website to view or request copies of our catalogs!

The “engine” that drives everything within a body of water is the presence of oxygen in proper levels. Installing diffused aeration in a pond or lake is the single most valuable water management and water maintenance strategy that can be implemented. The movement of oxygenated water from the bottom up provides many benefits to the water. As ponds age, organic muck load and total oxygen demands rise.

Diffused aeration gets to the heart of the matter! Oxygen is supplied by an on-shore compressor and delivered to diffusers placed on the bottom of the pond. The diffusers produce a cycling action of air bubbles that supplies the oxygen where it's needed most.

ARCHWAY BIO™

Creating enjoyable waters...naturally.

Archway Bio is the division of EasyPro Pond Products that handles all the water treatment production. EasyPro is a full line blending, packaging and labeling company offering a wide selection of treatments under our own brand as well as offering private label and bulk treatment options. Our products are widely used in the pond, lake, septic and waste water fields by customers around the world.

EasyPro offers a wider selection of treatment options under our own brand name as well as bulk products for applicators and those using large quantities of material. In addition, we offer private labeling of water treatments (minimum order quantities apply), concentrates and custom blends for customers wanting unique product offerings. Please call us for more information.

1 Existing EasyPro branded products

For the re-seller looking for finished products, we provide an established brand with an extensive line of shelf-ready products.

2 Private Label

For distributors, mail order catalog companies, internet marketing companies or any other re-seller that wants completed finished products. You provide your brand and we'll package it with custom labels.

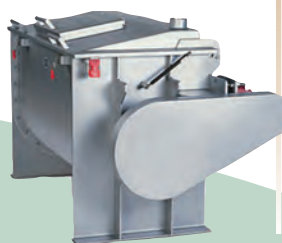

3 Bulk Product

For companies that cannot manufacture. Buy in bulk to repackage and label at your facility.

4 Concentrates & Raw Ingredients

For manufacturers that have the ability to blend, package and label products at their own facility

5 Customized Products & Packaging

For companies wanting unique product appearance and size. Choice of liquid/powder, tablets/packets and containers

Pond-Vive L

Liquid lake and pond bacteria

A convenient alternative to Pond-Vive in a liquid

- Similar formula to Pond-Vive powder, can be used to treat golf course ponds, farm ponds, municipal areas and similar applications
- Works to remove ammonia, nitrates, phosphates & sludge
- Application rate is one gallon per surface acre weekly for four weeks, then every two to four weeks for maintenance
- Two gallons will treat 1/4 acre pond for 10-16 weeks

Available in
55 gallon drum & 250 gallon tote
for large bodies of water.

See page 9

DOSAGE RATES

Initial Dose: One gallon per surface acre every week for four weeks, then maintenance dose.

Maintenance Dose: One gallon per surface acre every two weeks

Problem Ponds: One gallon per surface acre every week until desired results, then maintenance dose.

"We've tried many bacteria products over the years and found great success in Archway Bio's liquid pond bacteria for many of our high profile pond sites. Overall pond clarity and water quality parameters have been beyond our expectations".

Cory J Zickert, Wisconsin Lake & Pond Resource

Pond-Vive Beneficial Bacteria

SINCE 1970

Our Best Seller!

Pond-Vive

The natural, biological way to revive your pond. A blend of enzymes and beneficial bacteria, with a concentration level of five billion colony-forming units per gram!

A proprietary blend of enzymes and beneficial bacteria formulated to help improve water quality and reduce sludge in ponds, lakes and other water bodies. Pond-Vive works best when used in conjunction with aeration.

- Reduce sludge buildup and eliminate pond odors
- Improve water clarity and reduce oxygen demand
- Eliminate excess nutrients
- Enzymes - four strains which break down waste into an easier digestible form for the bacteria — speeds up the process!
- Easy to use eight ounce water soluble packets or loose powder
- Reduces ammonia, nitrite, nitrate and phosphate
- Barley straw additive
- Cold weather bacteria strains, for results in temperatures as low as 38°F

Pro Tip For even better results!

Use with Water Conditioner on page 8. The Clarifier settles particles to the bottom and the Pond-Vive eliminates them.

Available in several sizes from 5 pound pails for retail to 100 pound bulk drums

DOSAGE RATES

For best results Pond-Vive should be added every two weeks when water temperatures are above 55°F (can be added at colder temperatures but results will be diminished). The amount needed depends on the condition of the pond.

Newer ponds with little "muck"
Apply 4 lbs. per surface acre every two weeks

Older ponds with high levels of "muck"
Apply 6 lbs. per surface acre every two weeks

For best results the initial application should be doubled to jump start the process.

Example — One 10 lb. Pail Treats:

Pond Size	Newer Pond	Older Pond
1/4 Acre	5 Months	3 Months
1/2 Acre	2.5 Months	1.5 Months
1 Acre	1.25 Months	.75 Months

A 25 lb. pail extends months treated by 2.5 times

PB100XL

SINCE 1970

Sludge Remover Bacteria

Sludge Remover Pellets

Great for spot treating around docks, beaches or partially treating large ponds

Sludge Remover bacteria is designed specifically to remove organic sludge from the bottom of lakes and ponds. Sludge is the result of fish waste, dead algae or plant material, uneaten fish food, leaves and other debris. The pellets, when introduced to the water, sink, dissolve and begin to remove bottom organic sludge — often several inches per year.

Simply toss pellets or blocks in the water for easy application!

- Diminishes bottom sludge buildup
- Removes pond odors caused by stagnant water and decaying material
- Sinking pellets for precise and effective placement when spot treating
- Enhances water clarity and reduces murky water caused by organic wastes
- Helps lower oxygen demand in the pond
- Reduces problem causing nitrate and phosphates
- Fish, family and animal safe

Available in several sizes
from 5 pound pails for retail
to 50 pound boxes

DOSAGE RATES

Spot Treatment

One ounce of pellets covers approx.

200 - 250 square feet of shoreline or beach area — apply every two weeks

Full Pond Treatment

Two 8 ounce scoops per 1/4 acre
every two weeks

Example — One 10 lb. Pail Treats:

Pond Size	Newer Pond	Older Pond
1/4 Acre	5 Months	3 Months
1/2 Acre	2.5 Months	1.5 Months
1 Acre	1.25 Months	.75 Months

EASYPRO.COM

Super Concentrated Water Clarifier

Helps clear murky, turbid water by attracting suspended particles together, settling them to the bottom

- Works great when used with Pond-Vive, the clarifier settles the organic particles to the bottom where they are consumed by the Pond-Vive
- One gallon treats 250,000 gallons of pond water, ponds with high levels of suspended solids can be treated at double dosage or a second application
- For best results mix recommended amount with pond water and spray evenly over pond surface

Pro Tip For even better results!

Use with Pond-Vive on pages 5 & 6. The Clarifier settles particles to the bottom and the Pond-Vive eliminates them.

EasyPro Phosphate Binder

A critical step in effective pond management & maintenance

This all natural powder formulation provides a non-chemical alternative to using aluminum sulphate (ALUM), to bind problem causing phosphates in pond water. It will also buffer pH, provide approximately 70 beneficial trace minerals, provide minor flocculation (settling) of mud and clay particles and aid in reducing ammonia.

- Improve clarity
- Reduce phosphates
- Stimulate biological activity
- Works great with bacteria

DOSAGE RATE[†]

3-5 pounds per acre-foot of water to lower phosphate levels.

Part #	Description	Case Quantity	Stocking Code	Ship Weight	List Price
NPB15	Phosphate Binder, 15 lb. pail	4	377693	17 lbs.	\$110.99

New!

EutroSORB[®] WC Liquid Phosphate Binder

Targets phosphorus in water bodies that have excess amounts

A proprietary solution developed specifically for rapid and stable inactivation of phosphorus from the water column of a variety of water bodies such as lakes, reservoirs, ponds, rivers, streams, canals, ditches, etc. EutroSORB[®] WC is a high performance, water-soluble phosphate binder that does not stain equipment or features.

- Easy to use formulation
- Does not require a slurry mix prior to application
- Does not impact water chemistry
- Safe for fish, invertebrates, and personnel
- No irrigation restrictions
- Minimal product use for noticeable results

DOSAGE RATE[†]

1 quart per surface acre once monthly for 5 months through the warm season

Part #	Description	Case Quantity	Stocking Code	Ship Weight	List Price

Oxygen Based Pond Cleaner

Oxygen based pond cleaners have long been used in decorative ponds and water features to clean rocks, waterfalls and streams. This same great formula is also available in larger sizes for use in earthen ponds and lakes.

- Works immediately upon application
- Lifts debris to pond surface where it can be removed
- For spot treating use 2-3 pounds per 1000 square feet, for pond application use 12-15 pounds per acre-foot of water — a double dose can be used for problem situations
- Treat no more than 1/3 of the pond at a time
- Allow 48 hours between consecutive applications

Part #	Description	Case Quantity	Stocking Code	Ship Weight	List Price
OXY25	Oxy cleaner, 25 lb. pail	2	797493	28 lbs.	\$129.99

Barley Pellets

100% natural product from concentrated barley straw

- Safe for use with aquatic life and pets
- Typically apply every six to eight weeks
- Fast acting - steady and extended release

DOSAGE RATE

3-5 pounds per acre-foot of water to lower phosphate levels.

Septic and Drain 2-in-1 Treatment

A natural bacteria product for treating residential septic systems and household drains

- Billions of enzyme producing bacteria work to accelerate the breakdown of common household wastes such as cooking greases, vegetable oils, fruit/vegetable wastes, sugars, starches, proteins, human wastes, toilet tissue and hair
- Helps keep septic systems operating efficiently when used regularly
- Pre-measured dissolvable packets that dissolve in minutes
- No messy powders or liquids
- Helps prevent costly and unpleasant system backups
- One year supply for 1000 gallon septic systems
- Reduces odors in drain lines and garbage disposals

Septic - One ounce water soluble packets:

For a 1000 gallon residential septic system — simply flush one packet per month to maintain a healthy septic system. Dosage can be increased for neglected systems.

Quick & Easy Septic Treatment

Simply drop one (unopened) water soluble packet into toilet. It will dissolve in minutes. Flush toilet to force product into septic tank. Keep remaining product out of the reach of children.

Household Drains

Drop one (unopened) water soluble packet into one gallon of warm water. Stir solution before applying. Keep remaining product out of the reach of children.

Pour one to two cups of solution down each sink, shower and garbage disposal drain. This will simultaneously treat your septic tank and restore slow flowing drains.

Rakes, Weed Cutters, Net

32" Weed Rake

No need to worry which side lands up when you throw this rake out into the pond as there are teeth on both sides.

- Now with a cross-bar to keep the rope in place
- 17 - 3" long teeth on each side of the rake
- Baked on, powder coat finish
- Includes 25' of rope

**New
Improved
Design**

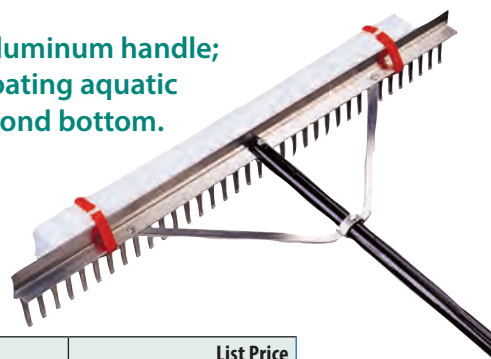

Part #	Description	Stocking Code	Ship Weight	List Price
EPR	32" Weed rake	7112498	6 lbs.	\$149.99

36" Deluxe Lake Rake

Aluminum rake comes with a two piece, 11', rustproof, powder coated aluminum handle; detachable polyethylene float and a 20' length of rope. Use it to skim floating aquatic vegetation and algae from the pond surface or remove float to use on pond bottom.

- Strong and lightweight aluminum construction
- Two 5 1/2' heavy duty, well constructed aluminum powder coated handles with permanent 5" vinyl grip
- 36" aluminum head with 4" teeth
- 30" removable styrene floater for shoreline cleanup
- 20' of 5/16" nylon rope

EASYPRO.COM

Identifying Aquatic Weeds & Algae

Algae

Filamentous algae is most common, growing in mats and strings. Planktonic algae causes green water, it has millions of cells that cloud together. Chara is weed-like, it grows like a carpet along the bottom.

Cattails & Other Emergent Plants

Emergent plants grow around the perimeter of a pond in shallow water with all or most of their foliage above water. Examples are Cattails, Bulrush, Reeds, Purple Loose Strife, Pennywort and Pickerelwood.

Pondweeds

The pondweed family has over a dozen varieties with these four being the most common: Sago, Clasp Leaf, Curly Leaf, Large Leaf

Elodea

This plant grows in thick clumps and is usually not a big problem, the leaves are in whorls of three around the stem.

Duckweed and Watermeal

Duckweed is hard to control, it forms a thin layer over the surface in calm ponds. It will not grow well in moving water so use of a surface aerator will help in controlling growth.

Water Lilies

Water Lilies can become a problem in many ponds, they grow off of a large central root system (much like poplar trees). Some growth is great for shade and cover for fish, but when left unchecked they will over populate quickly.

Eurasian Watermilfoil

Spreads very easy since fragments of plant can re-root and grow. Do not try to remove by raking.

Other Less Common Weeds

Include Naiad, Coontail, Bladderwort, Hydrilla, Parrot Feather and Water Hyacinth

SINCE 1970

Aquatic Weed Control

Many states restrict the shipment of EPA registered chemicals into the state. At this time most products that are not EPA registered are not restricted. Please look next to each product to see if it is EPA registered. If it is, please consult the information below to see if it can be shipped into your state:

- AK, CA, CT, ID, HI, ME, MA, NH, NJ, NY, RI, VT & WA restrict the shipment of products into their states. Products can be bought from within the state but not shipped in.
- No products may be shipped into Canada. These products are labeled for sale in US and do not meet Canadian registration or label requirements.
- GreenClean (GC20, GC50) can be purchased in NY but you must obtain a permit to apply in that state, all other states OK. GreenClean Pro (GC50PRO) is restricted in MA.

The following chart shows which treatments work best on each aquatic plant[†]

NOTICE: Copper sulfate is not included in this chart nor is it recommended due to problems with copper buildup in sediments and toxicity to aquatic organisms.

Permits may be required to apply these products. Consult appropriate local agencies for more information.

In cases where restrictions are not given in above chart, consult your State Conservation Commission or Fish and Game Department for specific restrictions. Chemical manufacturers and manufacturer's representatives can also supply you with specific recommendations based upon water usage. *See label for restriction information
+ Not for use in potable water

[†]Always refer to label for exact manufacturer's dosage rates and instructions.

EASYPRO.COM

Pond Dyes

SINCE 1970

The use of fish safe dye is a common part of an overall pond maintenance program. Pond dyes may be poured directly into the pond and upon complete dispersal, these dyes are non-staining and are fish, pet and wildlife safe. No water restrictions are associated with the use of pond dye.

Concentrated Pond Dye — Liquid

These concentrated dyes will save you in shipping costs

- One quart is equal to one gallon of other dyes on the market
- This is a nontoxic and harmless pond dye for use in ponds and lakes
- Waters can be used for swimming and irrigation once product is dispersed
- Compatible with most aquatic herbicides and algacides
- Black dye creates a more reflective surface appearance while the blue dye creates "Caribbean" blue water. Serenity dye is a mix of blue and black

Liquid Dosage Rate[†]

One quart treats one acre of water 4' deep (approx. one million gallons)

Half and full pallet discounts available - contact us for high volume needs

Part #	Description	EPA Registered	Case Quantity	Stocking Code	Ship Weight	List Price
ECPD	Blue Pond Dye, 1 quart	No	12	820995	3 lbs.	\$29.99
ECPDBK	Black Pond Dye, 1 quart	No	12	822394	3 lbs.	\$31.99
ECPDSB	Serenity Pond Dye, 1 quart	No	12	321692	3 lbs.	\$30.99

Concentrated Pond Dye — Powder

- Dry powder dye is cheaper to ship than liquid
- Four - 4 ounce water soluble packets (WSP) per pouch, simply toss into pond for easy application
- Safe for use with fish and aquatic life
- Three WSPs (water soluble packets) will treat one acre, 3'-4' deep
- Each WSP is double sealed in water soluble film

Great Value

- Buy a case of 5 pouches (20 WSPs) – Treats 6.66 surface acres, 4' deep

Best Value

- Buy a master case of 20 pouches (80 WSPs) – Treats 26.6 surface acres, 4' deep

WSP Dosage Rate[†]

Each four ounce water soluble packet treats 1/3 acre, 3'- 4' deep

Part #	Description	EPA Registered	Case Quantity	Stocking Code	Ship Weight	List Price
PD4P	Blue Pond Dye (dry), 4pk pouch	No	5	327298	2 lbs.	\$38.99
PD4PBK	Black Pond Dye (dry), 4pk pouch	No	5	730094	2 lbs.	\$42.99
PD4PSB	Serenity Pond Dye (dry), 4pk pouch	No	5	128698	2 lbs.	\$40.99

Aquashade[®]

E.P.A. registered pond dye that helps reduce aquatic plant growth by restricting sunlight into the pond, inhibiting photosynthesis in young bottom growing plants. Apply early in season for best results.

- Registered with the E.P.A. for weed and algae prevention
- One gallon treats one acre, 4' deep
- Safe for use with fish and aquatic life

Liquid Dosage Rate[†]

One gal. treats one acre of water 4' deep (approx. one million gallons)

Part #	Description	EPA Registered	Case Quantity	Stocking Code	Ship Weight	List Price
AQ10	Aquashade, 1 gallon liquid	Yes	4	363992	12 lbs.	\$79.99

[†]Always refer to label for exact manufacturer's dosage rates and instructions.

Filamentous Algae

Chara Algae

Planktonic Algae

Algaecides

Filamentous algae is made up of long strands of algae cells joined end to end. Often referred to as "string algae", this unsightly nuisance forms large mats on the surface, grows like moss on rocks, logs or other underwater structures and is very prolific.

Chara is a bottom growing algae that resembles a plant like form.

Often mistaken for an aquatic plant, Chara grows in dense patches but is not rooted to the bottom. A strong, musky odor and gritty texture is observed when the plant is examined out of the water. Usually found in clear, often spring fed ponds.

Planktonic algae or "pea soup algae" is caused by microscopic algae cells free floating in water. Mild cases may cause pond to have greenish tinge to it while a severe bloom will block visibility into the water.

Fortunately most types of algae are fairly easy to control. The products on these two pages are all fish safe and will provide effective control of algae when used according to the label. Unfortunately algae can be quick to return after a treatment. Ducks, herons and other wildlife can easily transport it between bodies of water. Repeated applications throughout a season may be necessary.

EarthTec® Liquid

**Highly soluble, liquid formula disperses itself!
Environmentally responsible algae control for
lakes, ponds, fountains and water features.**

Earthtec® kills algae quickly and maintains control for up to 30 days. Liquid formula is easy to apply - simply pour and walk away!

- Fast, visible results, usually within 24 hours and provides durational control for up to 30 days
- EarthTec® can be applied bi-monthly as preventative treatment
- Liquid formula is self-dispersing in bodies of water up to three acres. For larger bodies of water, pour in multiple places.
- Product does not settle out and remains in solution to prevent algae regrowth until product is depleted
- Certified to NSF ANSI 60 standard as a drinking water additive
- Not for use in water housing copper-sensitive fish, such as koi and trout

Dosage Rate[†]
0.33 to 5.43 gallons
per acre-foot

Part #	Description	EPA Registered	Case Quantity	Stocking Code	Ship Weight	List Price
ETEC1	EarthTec Algaecide - 1 gallon	Yes**	4	244996	12 lbs.	\$59.99
ETEC25*	EarthTec Algaecide - 2.5 gallons	Yes**	2	697492	26 lbs.	\$129.99

*Must ship as hazardous material with additional charges via UPS or motor freight. **EPA Registered in every state as an algaecide

Komeen® Descend

Sprays like a liquid, stays in place like a granule

MicroCRYSTAL Technology makes Komeen Descend the first of its kind in aquatics. It sprays like a liquid, but stays in place like a granule for improved contact exposure time and better results.

- MicroCRYSTAL Technology
- Low PPE
- No irrigation restrictions
- Effective control on vallisneria, hydrilla, pondweeds, etc. and filamentous and macro algae
- Easy to handle
- Not for use in water housing copper-sensitive fish, such as koi and trout

Dosage Rate[†]
1.25 to 3.3 gallons
per acre-foot

Part #	Description	EPA Registered	Case Quantity	Stocking Code	Ship Weight	List Price
KOMD25	Komeen Descend - 2.5 gallons	Yes	2	3127994	27 lbs.	\$159.99

*Must ship as hazardous material with additional charges via UPS or motor freight.

†Always refer to label for exact manufacturer's dosage rates and instructions.

Cutrine-Plus® Liquid

Strong algaecide and herbicide formulation provides fast results on most types of algae.

- A chelated copper algaecide that is safer to use than copper sulfate
- Use for surface or suspended algae
- Apply by sprayer to surface, for best results use with activator on page 18
- Larger containers up to 250 gallon totes available. Please inquire.
- Not for use in water housing copper-sensitive fish, such as koi and trout
- EPA registered

Dosage Rate[†]

0.6 to 3 gallons
per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
CPL	1 gallon	4	952796	12 lbs.	\$65.99

Cutrine® Ultra Liquid

Powerful results on tough-to-kill algae

- Ideal for thick walled filamentous algae, colonial planktonic algae and Chara
- No water use restrictions
- Dilute and apply by sprayer for best results
- Surfactant/activator mixed in already — no need for additional mixing
- Available in 2.5 gallon containers
- Not for use in water housing copper-sensitive fish, such as koi and trout
- EPA registered

Dosage Rate[†]

0.6 to 3 gallons
per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
CPLU25*	2.5 gallon	2	5103753	26 lbs.	\$129.69

*Must ship as hazardous material with additional charges via UPS or motor freight.

Cutrine® Plus Granular

Controls bottom-growing algae and Hydrilla

- The granular form of Cutrine®
- Rapid sinking granules for targeted delivery
- For bottom filamentous algae: 20 to 60 pounds per surface acre
- For chara: 30 to 90 pounds per surface acre
- Not for use in water housing copper-sensitive fish, such as koi and trout
- EPA registered

Dosage Rate[†]

20 to 90 pounds
per surface acre

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
CPG1	12 lb. jug	4	654395	14 lbs.	\$67.99
CPG3	30 lb. bag	3	3111196	32 lbs.	\$138.99

SeClear G Algaecide & Water Quality Enhancer®

Algaecide and water quality enhancer® for use in ponds, lakes and reservoirs

- Controls surface and bottom algae
- Excellent for controlling Chara and Hydrilla
- Broadcast as a granule or dissolve and spray
- Not for use in water housing copper-sensitive fish, such as koi and trout
- EPA registered

Dosage Rate[†]

Filamentous Algae
15 to 20 lbs. per surface acre
Chara and Starry Stonewort
35 to 50 lbs. per acre

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
SCG20	20 lb. bag	1	2143997	24 lbs.	\$179.99
SCG50	50 lb. bag	1	7319998	52 lbs.	\$399.99

†Always refer to label for exact manufacturer's dosage rates and instructions.

GreenCleanPRO Granular

- Concentrated - twice the active ingredient as regular GreenClean!
- For use in ponds 1/4 acre or larger due to concentrated formula
- Use approximately 8-25 pounds per acre-foot as a preventative every two to four weeks
- EPA registered

Dosage Rate[†]

One bag treats up to 34 acre-feet

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
GC50PRO*	50 lbs.	—	5135596	52 lbs.	\$169.49

*Must ship as hazardous material with additional charges via UPS or motor freight.

Tribune™

Fast-acting aquatic herbicide

- This herbicide/algaecide is rapidly absorbed by the treated aquatic vegetation to desiccate (dehydrate) plant tissue on contact
- Effective on a wide variety of submersed, emergent and floating aquatic plants.
- Stops plant photosynthesis within minutes depending on conditions
- Applied by sprayer (should not be applied to turbid waters)
- Should be used with an activator (page 18) for best results
- Active ingredient is 37.3% diquat dibromide
- EPA registered

Dosage Rate[†]

1 to 2 gallons per acre

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
TRIB25*	2.5 gallon	2	3207994	26 lbs.	\$259.99

*Must ship as hazardous material with additional charges via UPS or motor freight.

GreenClean Granular

- EPA registered, non-copper algaecide
- Works through oxidation to provide fast results
- Organic certified by OMRI (Organic Materials Review Institute). No harm to fish or environment when used at recommended rates, no water use restrictions
- Algae can be killed within 24 - 48 hours of application, starts working in minutes

Fast Acting!

Dosage Rate[†]

As Preventative
16 to 50 lbs. per acre-foot
As Treatment
50 to 180 lbs. per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
GC20	20 lbs.	4	474993	24 lbs.	\$99.99
GC50	50 lbs.	3	3129747	55 lbs.	\$172.99

Trace (Activator/Surfactant)

Improves the effectiveness of liquid algaecides and herbicides

- Trace is a liquid additive for use along with liquid herbicides and algaecides to enhance their effectiveness.
- The surfactant in this product eliminates beading, providing a uniform spray solution. This ensures maximum contact with the plant's foliage. The low viscosity oil in these products breaks down the waxy coating on leaf surfaces for improved penetration and coverage.

Dosage Rate[†]

Mix three ounces per gallon of water in sprayer

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
NVT128	1 gallon	1	839992	11 lbs.	\$49.99

*Restricted into CA, ID, WA and Canada

[†]Always refer to label for exact manufacturer's dosage rates and instructions.

Aquatic Weed Control

SINCE 1970

New!

Navigate® Granular

For selective control of unwanted aquatic plants

- A 2,4-D based herbicide for control of water lilies, coontail, Eurasian milfoil, parrot feather, watershield and bladderwort.
- Granular form makes it ideal for spot treating
- Formulated on specially treated granules for controlled release in the water
- Granules sink quickly to lake or pond bottoms and release the weed controlling active ingredient into the critical root zone area for plant absorption
- Slight water restrictions (see chart page 13)
- EPA registered

Dosage Rate[†]

28 to 56 pound
per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
NV50	50 lb. bag	—	6327997	52 lbs.	\$409.99

Glyphosate 5.4

Systemic aquatic herbicide that kills aquatic weeds to the roots. Glyphosate-based liquid formula to kill emergent pond weeds.

- Non-selective
- For use on shoreline weeds
- Fish safe aquatic herbicide
- No water use restrictions after use
- Best used with an aquatic surfactant (see Trace on page 17) and sprayed directly on leaves
- EPA registered

Dosage Rate[†]

Mix 6 to 10 ounces per gallon of water in sprayer with surfactant

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
GLYG*	1 gallon	1	550393	12 lbs.	\$62.99
GLY25*	2.5 gallons	1	7103197	24 lbs.	\$128.99

*Cannot be shipped to Alaska, California, Connecticut, Hawaii, New Jersey, New York

Nautique® Liquid

Fast-acting, economical contact pond herbicide

- Nautique's copper ions inhibit plant photosynthesis, cutting off the food source of undesired plants and providing rapid results
- Dual chelated copper product controls eel grass, water celery, hydrilla, naiads, chara, elodea, sago, American thin leaf pondweed and more!
- Available in 1 and 2.5 gallon containers
- Tank mix and apply with sprayer
- No restrictions on water usage
- Not for use in water housing copper-sensitive fish, such as koi and trout
- Not EPA registered

Dosage Rate[†]

1.5 to 3 gallons
per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
NAU10	1 gallon	4	875994	12 lbs.	\$94.99
NAU25*	2.5 gallons	2	8175996	24 lbs.	\$219.99

*Must ship as hazardous material with additional charges via UPS or motor freight.

Clearcast®

The industry standard for cattail control.

- Industry standard for cattail control any time of the year
- Provides true systemic activity by killing the entire plant, including root system
- Controls floating, emergent and shore-line weeds, while leaving desirable plant species unaffected

Dosage Rate[†]

Per Surface Acre: Cattails 32 oz. to 64 oz.,
submersed weeds .25 to .5 gallon

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
CCAQ	1 quart	1	\$159.99	2 lbs.	\$199.99
CCAG	1 gallon	1	\$471.99	11 lbs.	\$589.99

†Always refer to label for exact manufacturer's dosage rates and instructions.

Hydrothol®

Granular Contact Herbicide

- Fast acting herbicide is effective on a variety of aquatic weeds including milfoil, coontail, hydrilla, sago pondweed, leafy pondweed, curly leaf pondweed and others.
- Hydrothol® should only be used for spot treating
- Use Aquathol® early in the season when plants are young and easier to treat - see page 20
- Slight water restrictions (see chart page 13)
- EPA registered

Dosage Rate[†]

108 to 270 pounds
per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
HYD20	20 lb. bag	2	3111997	22 lbs.	\$139.99
HYD40*	40 lb. box	—	3214394	43 lbs.	\$267.99

*40 lb. box contains two 20 lb. bags

Reward® Concentrated

Broad range weed control

A fast acting 37.3% diquat dibromide herbicide that desiccates plant tissue on contact. Reward® stops plant photosynthesis within minutes depending on conditions. Effective on a wide variety of submersed, emergent and floating aquatic plants.

- This liquid herbicide is applied by sprayer and should not be applied to turbid waters
- There is very little risk of environmental damage since Reward's concentration rapidly decreases as it is absorbed into the aquatic vegetation
- Should be used with activator (page 17) for best results
- EPA registered

Dosage Rate[†]

1 to 2 gallons
per acre

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
REW10	1 gallon	4	6159997	12 lbs.	\$199.99
REW25*	2.5 gallons	2	5335991	26 lbs.	\$419.99

*Must ship as hazardous material with additional charges via UPS or motor freight.

Harpoon®

Granular Contact Herbicide

- Treat from the bottom up! Harpoon® sinks down to effectively control bottom-growing copper sensitive aquatic species.
- Ideal for sites where water use cannot be restricted. Treated water can be used immediately for irrigation, animal consumption, swimming or fishing.
- Controls hydrilla, naiads, coontail, elodea, water hyacinth and others. In waters with low alkalinity, may also control Eurasian watermilfoil, sago, curly-leaf and select other weeds in the pondweed family
- Can be applied as a spot treatment or large scale treatment
- EPA registered

Dosage Rate[†]

40 to 240 pounds
per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
HARP40	40 lb. bag	—	6151994	43 lbs.	\$189.99

Weedtrine® D

Fast acting, broad range weed control

This 8.53% diquat dibromide product is a non-volatile herbicide for use in controlling submersed and floating aquatic weeds. Absorption and herbicidal action of Weedtrine D is usually quite rapid.

- Broad range herbicide that controls duckweed, coontail, elodea, naiad, pondweed and milfoil
- Applied with common sprayers, use with activator (page 17)
- Results often begin to show in as little as three days, five day water restriction

Dosage Rate[†]

Per Acre: Duckweed 5 to 7 gallons,
submersed weeds 5 to 10 gallons

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
WTD	1 Gallon	4	883192	12 lbs.	\$103.99

[†]Always refer to label for exact manufacturer's dosage rates and instructions.

Aquathol® K and Aquathol® Super K

Available in liquid and concentrated granular forms

- Excellent for spot treatment of hydrilla, pondweed and Eurasian watermilfoil
- Aquathol® Super K granular form — 10 or 20 pound containers
- Granular herbicide utilizing Culigel® super absorbent polymer technology.
- Six times more concentrated than regular Aquathol®.
- Aquathol® K liquid form — 1 or 2.5 gallon jugs
- EPA registered

Dosage Rate[†]

Granular: 3.3 to 22 lbs. per acre-foot

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
AQU10	Granular, 10 lbs.	4	7319994	12 lbs.	\$399.99
AQU20*	Granular, 20 lbs.	2	8559995	23 lbs.	\$699.99
AQUL10	Liquid, 1 gallon	4	5139996	12 lbs.	\$174.99
AQUL25*	Liquid, 2.5 gallon	2	4303993	25 lbs.	\$379.99

*Must ship as hazardous material with additional charges via UPS or motor freight.

Sonar® A.S.

Specialty herbicide that controls a broad range of aquatic weeds

41.7% fluridone product is perfect for whole pond and lake treatments. A selective systemic aquatic herbicide for management of aquatic vegetation in fresh water bodies. Maintain the recommended concentration in contact with the target plants for a minimum of 45 days.

- Apply early in the season, prior to or just after plant growth begins. Sonar is absorbed by the plants and inhibits the weed's ability to make food, causing it to die
- Very effective on duckweed and milfoil
- Treatments last for several seasons in many cases, depending on plants

- Complete kill can take 30 to 90 days
- EPA registered

Dosage Rate[†]

32 ounces treats up to one acre

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
SO8	8 oz.	6	5343995	1 lb.	\$429.99
SOP	16 oz.	6	8559996	2 lbs.	\$699.99
SOQ	32 oz.	6	5103993	4 lbs.	\$1299.99
SOG	1 gallon	4	6263997	12 lbs.	\$3299.99

Propeller®

Fast acting, contact aquatic herbicide

- Controls selected submersed, emergent and floating aquatic weeds. It is most effective when applied to young, actively growing weeds in water with a pH of less than 8.5.
- A new treatment option at a time when herbicide resistance, variable response and environmental concern issues loom large
- Ideal for duckweed, watermeal, Eurasian milfoil and water lettuce
- Non-corrosive, fine granule – mix with water to apply. Active ingredient is 51% Flumioxazin.
- EPA registered

Dosage Rate[†]

6 to 12 oz. per acre for duckweed/watermeal
1.1 to 2.1 lbs. per acre-foot for submersed plants

While supplies last

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
PRP1	1 lb.	4	481135	2 lbs.	\$98.69
PRP5	5 lbs.	4	4317698	6 lbs.	\$383.49

No shipment to AK, CA, CT, ID, HI, ME, MA, NH, NY, RI, VT, WA & Canada

Clipper™

Fast and selective control of tough invasive & nuisance plants

This 51% Flumioxazin product is very versatile and has been showing excellent results in aquatic environments on a variety of plants. Fast, effective, and breaks down quickly in the water to leave no accumulation in the sediment — making it less of an environmental concern than other, more persistent herbicides.

- Intended to provide aquatic plant managers with new treatment options at a time when herbicide resistance, variable response and environmental concern issues loom large
- Ideal for duckweed, watermeal, Eurasian milfoil, water lettuce and several types of submersed weeds
- Non corrosive, dry powder - mix with water to apply

Dosage Rate[†]

Use 1.1 lbs. per acre-foot for duckweed/watermeal control

Part #	Size	Case Qty.	Stocking Code	Ship Weight	List Price
CLIP5	5 lbs.	—	2319994	6 lbs.	\$399.99

[†]Always refer to label for exact manufacturer's dosage rates and instructions.

Diffused Aeration Experts!

As one of the country's largest manufacturers of diffused aeration systems, EasyPro has the products and the experience to help you with nearly any aeration project. From oil fracking ponds to wastewater lagoons to backyard recreational ponds and lakes, we have solutions for a huge range of applications.

Not only does EasyPro build our aeration systems here in the USA, we source all major components of our systems from USA made products! From our aeration cabinets — to our weighted airline — to our self-sinking diffuser bases, we strive to use "USA-made parts whenever possible!

Let us help you select the proper system

Google Earth™ Designs

On the following pages are numerous complete aeration systems for a wide range of ponds. If you are unsure which one is best for you or if you have unique requirements please send us your information and we will do a Google Earth layout for you. We need from you:

1. Physical address - please note, newer ponds may not yet show up on Google
2. Depth of pond - important for determining diffuser locations
3. Where power is available and what type of power (115v/230v)

Fill out our online Aeration System Request form (under the Resources tab at easypro.com) or send this information to: aeration@easypro.com and we will be happy to design a system for you!

Custom Systems

Custom systems are our specialty! When one of our many standard systems doesn't fit your application, we can build a custom system to meet your exact needs. The type of compressor, number of diffusers, size/length of tubing and cabinet options are all able to be adjusted based on your needs. We welcome the opportunity to create systems for unique and challenging applications!

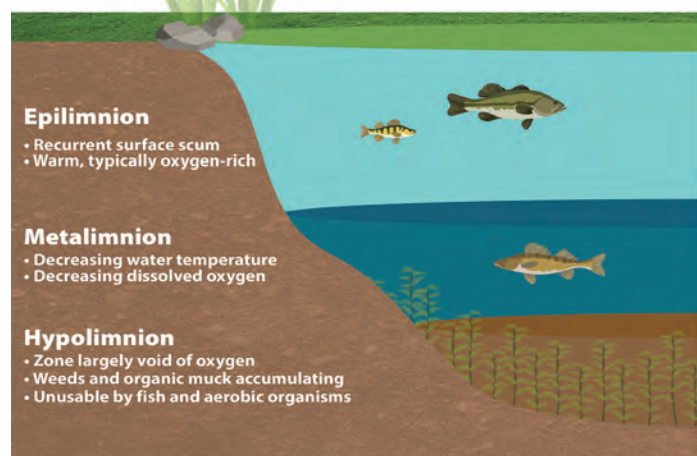

Google and the Google logo are registered trademarks of Google, Inc., used with permission.

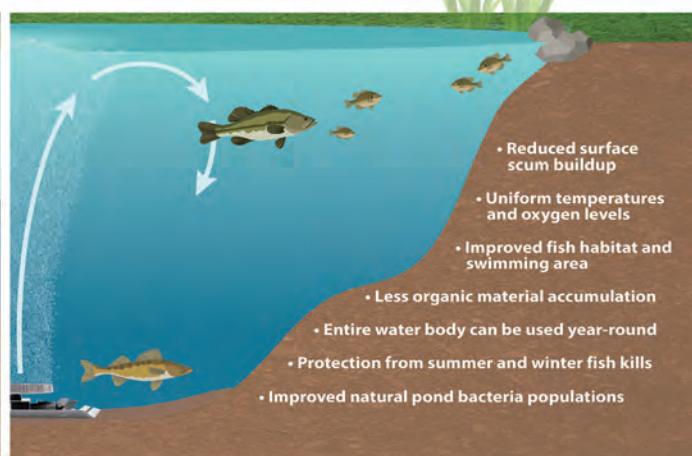

The “engine” that drives everything within a body of water is the presence of oxygen in proper levels. Installing diffused aeration in a pond or lake is the single most valuable water management and water maintenance strategy that can be implemented. The movement of oxygenated water from the bottom up provides many benefits to the water. As ponds age, organic muck load and total oxygen demands rise.

Diffused aeration gets to the heart of the matter! Oxygen is supplied by an on-shore compressor and delivered to diffusers placed on the bottom of the pond. The diffusers produce a cycling action of air bubbles that supplies the oxygen where it's needed most.

Stratified Without Aeration

De-Stratified With Aeration

Selecting EasyPro® Diffused Aeration Systems

On the following pages you will find EasyPro diffused aeration systems in complete kits. From basic kits to deluxe kits to custom kits, we have a wide range of aeration options. *Look for compressors and systems with Sound Shield pre-installed for the quietest systems on the market!*

Basic Aeration Systems

All the components necessary to aerate a pond. A compressor, tubing, diffuser(s) and fittings are sized to work together for a working aeration system. These kits will require additional weather protection for the compressor, but the kit as a whole provides a complete system.

Sentinel Deluxe Aeration Systems

Sentinel systems are designed for convenience and reliability. These systems contain a compressor mounted in a deluxe cabinet with sound proofing, tubing, diffuser(s) and fittings. All components are sized to work together for an effective aeration system.

Customizable Systems - Adding Tubing, Diffusers and Cabinets Customize a Basic or Deluxe system if tubing or diffuser types need to be adjusted. Kits designed to be customized are designated in the part number by “A” or “LD”. “A” kits are systems without tubing*. “LD” kits are systems without diffusers. Custom tubing lengths, choosing a preferred diffuser type or adding a cabinet/enclosure can be done by starting with one of these kits and making appropriate adjustments. See chart on page 23. *PA34-2 kits do not have tubing either

Tubing
see page 52

Diffusers
see pages 54-55

Cabinets & Enclosures
see pages 56-58

EasyPro Pond Products is a leader in the field of lake and pond management. Combined, our sales staff has over 150 years of lake and pond management experience — we can assist you in developing a management plan for nearly any application, from small farm ponds to large lakes.

We offer everything you need to monitor, treat and maintain earthen ponds and lakes. From testing equipment to weed/algae treatments to aeration systems, our experienced staff is happy to help with any management need.

Have questions? Call the aeration experts at 800-448-3873!

The amount of surface area an aeration system will effectively cover is greatly dependent on two factors - depth and shape.

Depth

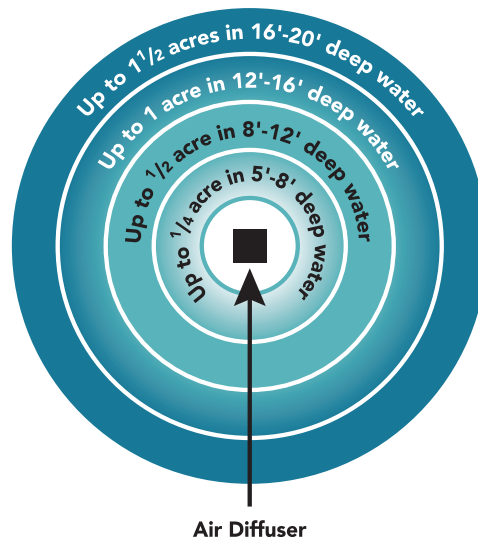

The diagram to the right shows how much surface area is effectively aerated per air diffuser at various depths:

Example

Our PA34 pond aerator would aerate only $\frac{1}{4}$ of an acre if operated in 5' deep water, while aerating up to $1\frac{1}{2}$ acres if operating in 16' - 20' of water.

Ponds that are irregular or odd shaped will also reduce size of aeration area — call our technical assistance department for additional help.

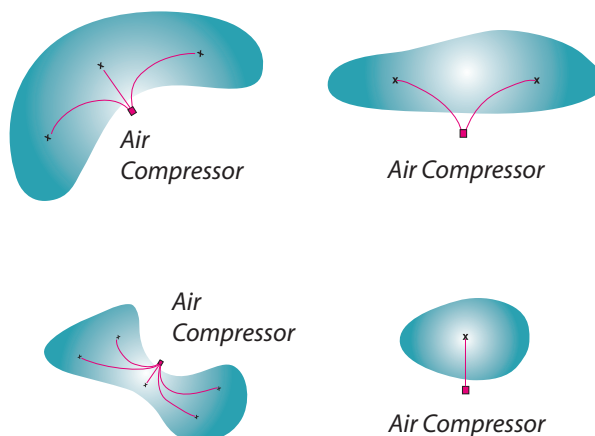

The deeper an air diffuser is located, the more "boiling action" it will create and a larger area will be aerated.

Shape

Pond shape affects the amount of diffusers needed. Irregular shaped ponds require multiple diffusers to adequately aerate entire water column.

A unique shaped pond or lake will require more diffusers to cover the same surface area.

EasyPro Aeration Systems Overview

We offer many configurations of aeration systems to ensure that you can order the exact system that you need for your application.

The chart on the right shows a simplified view of the ending letters of our aeration kit part numbers and what components are contained in each kit.

These kits are located on pages 28-39.

Base Kit Ends In:	Includes Compressor	Includes Diffuser	Includes Tubing	Includes Ground Cabinet	Includes Post Mount Cabinet	Includes Manifold/Outlet Assembly

THE INDUSTRY'S QUIETEST!

EasyPro® Aeration powered by Stratus™ SRC Compressors
and quieted by Sound Shield technology.

Hear the
Difference!

Game changing > 50% reduction in perceived loudness
compared to competitors' compressors

Unchanged reliability and proven performance

All EasyPro® Sentinel Aeration Kits with Stratus™ SRC Compressors
now include Sound Shield and cabinet with noise reducing foam.
Kits are available to easily retrofit existing Stratus™ SRC Compressors.

Rocking Piston Compressors with Sound Shield™

EasyPro's best selling Stratus™ SRC Series "Gen 2" Rocking Piston Compressors with the addition of revolutionary Sound Shield technology are the quietest compressors of their class in the industry!

These compressors are specifically designed for the demanding job of 24 hour operation. The oil-less design makes them ideal for pond aeration systems. Available in 1/4, 1/2, 3/4 and 2 hp models, the Stratus™ SRC Series Compressors are assembled in the USA. Protect your investment while making them even quieter - see our cabinet options on pages 57-58.

Features

- Universal dual voltage, 1725 RPM (50/60Hz) motor
- Oil-less operation
- Permanently lubricated bearings
- Includes **Stratus™ Smart-Start** technology to start under load
- Superior quality, flexible cup material for increased reliability
- Die-cast body components for overall strength
- Rebuild kits sold on page 45
- Single or double cylinder design
- Inlet/Outlet Size:
1/4 hp - 3/4 hp: 1/4" fpt
2 hp: 3/8" fpt
- Maximum psi:
1/4 hp and 1/2 hp: max 30 psi
3/4 hp: max 145 psi
2 hp: max 125 psi

Air De-Icing Systems

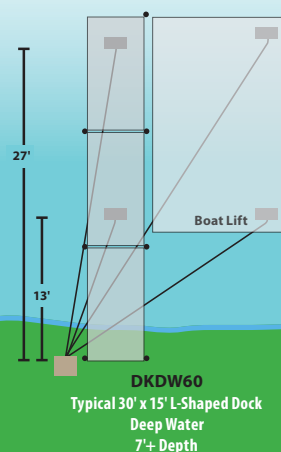

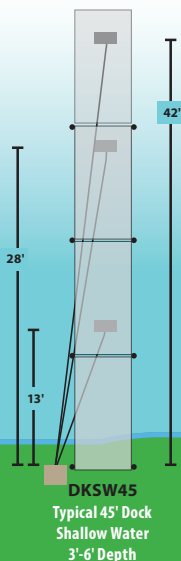

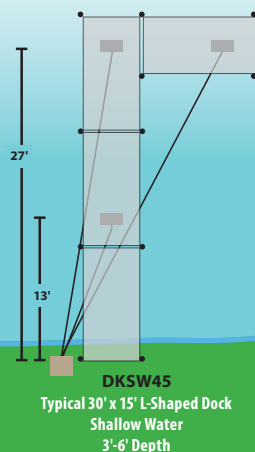

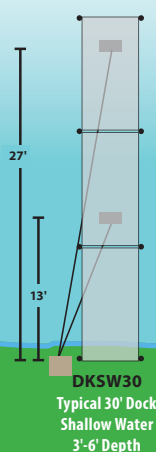

SINCE 1970

Diffused Air De-Icing Systems

Protect your dock investment from costly ice damage

Diffused air de-icing systems are an excellent choice for keeping water open around boat lifts, docks, piers, marinas and other structures needing to be ice-free in the northern climate. A minimum of three foot deep water is needed for diffused air to be effective. Ice damage can be very costly and paying to have docks and boat lifts removed and installed every year has considerable cost. For just a few dollars per month in electric, a diffused air system will maintain open water and prevent these yearly expenses.

Two 60 watt KLC compressors keep the docks and boat lifts shown ice-free for less than \$10 per month!

Shallow Water Systems for 3'-6' depths

- Low electrical consumption; as low as \$5 per month
- See page 50 for Stratus™ KLC compressor detail
- ½" QuickSink tubing and self-weighted diffusers for easy installation and optimal performance

Deep Water Systems for 7'+ depths

- Energy efficient; as low as \$27 per month
- See pages 42- 44 for Stratus™ SRC compressor detail
- ¾" QuickSink tubing and self-weighted diffusers for easy installation and optimal performance

DKDW60 & DKDW100 also available with Sound Shield
for the quietest de-icers in their class! Learn about it on page 24.

For Large-Scale Marine De-Icing Solutions, we have the products and experience to help you with de-icing!

800-448-3873

Aeration Kits for Shallow Ponds

For ponds 7' deep or less, these linear powered aeration systems are a great choice

- Extremely energy efficient
- Very quiet operation
- Long lasting, oil free design
- Weather resistant enclosures - can be used outdoors, for maximum longevity use additional protection from elements
- **With self-weighted diffusers for easier installation**
- Three year warranty on compressors, five years on tubing/diffusers

Choose from either single or double diffuser system. Single diffuser is ideal for round or regular shaped ponds. Use the dual diffuser system for long and narrow or irregular shaped ponds. Both kits include QuickSink tubing for easy installation.

Remote Access Valve Assemblies

- In some situations it is easier to locate a compressor near an existing power supply that is far away from the pond and extend the tubing rather than run power to pond's edge.
- Typically a single, larger diameter, poly tubing will carry all the air from the compressor down to the edge of the pond where the valve assembly will be located. This prevents having to run multiple smaller lines between compressor and shore.
- These assemblies are simply an "adder" to the kit cost. A single line set up coming off the compressor is included along with a modified valve assembly for installation by the pond.

Simply order the correct remote valve part number shown below along with your desired aeration kit. Then add the cost shown below to the kit cost for total package price.

Rocking Piston Systems* Add-Ons

Part #	Order With	Stocking Code	List Price
RPA62	Two or three valve outlets - set up for 5/8" line	733741	\$44.99
RPA75	Four to six valve outlets - set up for 3/4" line	333746	\$44.99

Single line systems (PA34) do not need modification for remote operation

Rotary Vane Systems* Add-Ons

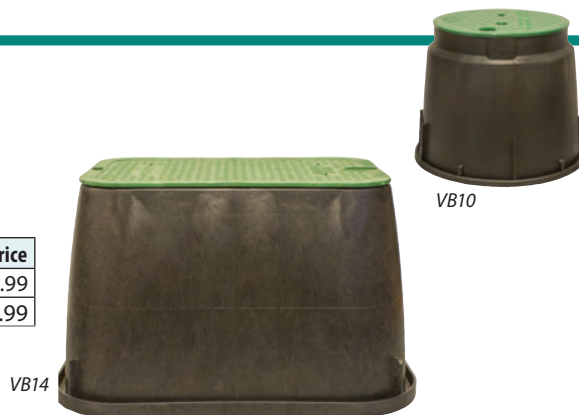

Part #	Order With	Stocking Code	List Price
RVA10	Two valve (PA50) outlets, set up for 1" line	141996	\$55.99
RVA12	Four to six valve outlets - set up for 1 1/4" line	741993	\$55.99

**For dual compressor systems, use quantity of two for remote valve assembly price adder.*

Valve Boxes

- Use these handy boxes to conceal the valve underground and yet have easy access
- Box is black in color, lids are green

Part #	Size	Stocking Code	Ship Weight	List Price
VB10	10" diameter x 10" deep	433323	2 lbs.	\$42.99
VB14	14" x 19" x 12" deep	643998	15 lbs.	\$54.99

Large Aeration Systems

SINCE 1970

EasyPro offers an unlimited number of options for aerating large bodies of water. Typically we prefer to use multiple smaller systems around the perimeter of a lake but in some cases, one or two large compressor stations are utilized and then air is pumped all around the lake from those points. EasyPro offers stock aeration systems for lakes up to 20 acres and custom aeration for larger lakes. Custom systems can run up to 100+ diffusers from a single compressor. These systems are custom designed for each application rather than sold in "kit" form due to the complexity and uniqueness of each body of water.

Rocking Piston Systems These double compressor systems are designed for large ponds and lakes where high volumes of air are needed.

Two compressors are mounted in the SC28N large cabinet (page 58), allowing up to eight air lines from a single location.

Since the amount of tubing needed can vary widely in larger projects, these systems are designed with everything you need for a complete system, less the tubing.

- Choose from 1/2 or 3/4 hp compressors with **Sound Shield**. See chart below for number of QS2 self-weighted diffusers per system
- Cabinets are mounted on equipment base and come complete with compressors, valve assemblies, pressure gauge, pressure relief valves, high volume cooling fans, electrical box and sound proofing.
- Cabinets feature dual fans for increased cooling capability
- Includes fittings for either 3/8" or 1/2" QuickSink tubing. Purchase tubing separately on page 52.
- **Now includes pre-installed sound proofing**

*Power cords available from cabinets for plug-n-go operation.

Need Large Lake Aeration? We Can Help!

Let us help you determine which products work best for your needs. We will put together a complete aeration quote for you.

Due to the complex nature, please allow extra time when designing these projects.

High Pressure Rocking Piston Systems

New high-pressure 2 hp rocking piston aeration system! It's a rugged, reliable workhorse and the most powerful rocking piston compressor on the market! With these systems, you can reach deeper depths and achieve longer runs than ever before, all with smaller airlines. If you are facing a job that requires long tubing runs, or has deeper than normal depths, look no further!

- Includes new 2 hp Stratus SRC compressor with  **Sound Shield**
- Your choice of (6) or (10) diffusers
- Offers longer tubing run capabilities than any other system
 - 1,500' with 3/8" tubing*
 - 4,000' with 1/2" tubing*
 - 20,000' with 5/8" tubing*
- *based on 2 cfm per line/the DCS206HP system*
- Cabinets are mounted on equipment base and come complete with compressor, valve assemblies, pressure gauge, pressure relief valves, high volume cooling fans, electrical box and sound proofing.
- Includes fittings for either 3/8" or 1/2" QuickSink tubing. Purchase tubing separately on page 52
- **Cabinet includes pre-installed sound proofing**

Wind Driven Aerators

Let Mother Nature aerate your pond

Windmill aerators can save \$30-\$50 per month in electric costs, paying for themselves in a few short years. Ideal for aerating remote ponds with no electricity nearby.

- Stable, four leg design
- Long-lasting, reinforced neoprene diaphragm
- 6' diameter head with 12 blades operates in wind as low as five miles per hour
- Produces 2.4-5 cfm (depending on air speed) for ponds up to 40' deep
- Over speed protection — tail section will turn head in high winds preventing over spinning
- Includes 48" long anchor stakes
- Includes hinge set
- Can effectively aerate ponds up to two acres depending on shape and depth
- Windmills can sit up to 1000' away from pond's edge — use poly tubing on page 52

Five Year Limited Warranty

Windmill Kits - include 50' of poly tubing, 100' of QuickSink tubing and dual head QuickSink diffuser

Windmill Freeze Control System

- Recommended whenever the windmill is located away from the pond's edge
- If the line starts to freeze, the control valve opens and feeds ethanol alcohol (or rubbing alcohol) into the line to melt the ice, the valve then closes and normal operation resumes

Part #	Stocking Code	Ship Weight	List Price
WMFC	7212462	6 lbs.	\$249.95

Red Stripe Kit

Add the Red Stripe Kit to your order. It's like putting racing stripes on a classic roadster!

Stickers are pre-cut and easy to apply.

NightAir™ Battery Back Up Solar Aeration Systems

The Off Grid Solution for Night-time Aeration

- 2 high output solar panels with easy install racking system – over 600 watts!
- 2 deep cycle AGM 200 Ah batteries
- Bluetooth enabled solar controller
- Quiet Quantum™ 24v brushless piston compressor
- 2.2 CFM output at 5 psi
- 2 high output fans on every system for optimal cooling
- Powder coated aluminum cabinet with secure locking system
- OWS Optimal Air™ self-cleaning rubber membrane diffusers with weighted base
- Mounting pole included

Warranty:

- 2 year warranty on compressors and electrical components
- 5 year warranty on all diffusers, bases and airlines
- 15 year warranty on all solar panels
- Lifetime warranty against rust on all aluminum cabinets

NitroAir™ 24 v Direct Drive Solar Aeration Systems

Affordable Solar Aeration without compromising quality!

The same benefits as the Turbo Air system but with a pole mount cabinet vs. an aluminum ground cabinet. This system comes with your choice of either one or two high output solar panels. MaxEnergy™ controller provides significantly longer run times. All-inclusive turn-key kits have everything except for concrete.

- Highest CFM in the industry for a 24v DC Direct Drive Solar System – 3.4 CFM @ 5 psi.
- Replaceable intake filter and maintenance kits available
- 24v DC rocking piston compressor
- Choose one or two solar panels. The + systems have an additional solar panel that extends aeration run time by 3-4 hours per day on clear days.
- Turn-key system including the steel mounting pipe
- 2 year warranty on compressors and electrical components
- 5 year warranty on all diffusers, bases and airlines
- 15 year warranty on solar panels
- Additional airline available

TurboAir™ 24v Direct Drive Solar Aeration Systems

The Off Grid Solution for Direct Drive Solar Aeration

Two high-output solar panels with the proprietary MaxEnergy™ controller provide significantly longer run times. The all-inclusive kits allow for easy and quick installation – you just add the concrete.

- Highest output rocking piston compressor rated at 3.4 CFM at 5 psi
- Longest run time over all competitors due to 2 high output solar panels providing > 600 watts of power
- Proprietary MaxEnergy™ Solar Controller
- 2 cooling fans to keep the compressor cool and extends compressor life
- Pressure gauge and pressure relief valve on all units.
- Powder coated aluminum cabinet with lifetime warranty
- 2 high output solar panels with aluminum racking and mounting pole

Warranty:

- 2 year warranty on compressors and electrical components
- 5 year warranty on all diffusers, bases and airlines
- 15 year warranty on all solar panels
- Lifetime warranty against rust on all aluminum cabinets

TurboAir™ XL 24 v Direct Drive Solar Aeration

Highest CFM in the industry for a Direct Drive Solar System

The TurboAirXL™ 24v direct drive solar aeration system offers the same benefits as the TurboAir™ system but with two compressors and twice the air. This system comes with two high output solar panels. Our MaxEnergy™ controller provides significantly longer run times and our all-inclusive turn-key kits provide everything needed except for concrete.

- Highest CFM in the industry for a 24v DC Direct Drive Solar System – 6.8 CFM @ 5 psi.
- Aerates ponds up to 35' deep
- Replaceable intake filter and maintenance kits available
- 24v DC rocking piston compressor
- **2 year warranty on compressors and electrical components**
- Turn-key system including the steel mounting pipe
- **5 year warranty on all diffusers, bases and airlines**
- **15 year warranty on solar panels**
- Additional airline available
- Solar panel array measures 130" x 80"

Rocking Piston Compressors

Stratus™ SRC Series "Gen 2" Rocking Piston Compressors are specifically designed for the demanding job of 24 hour operation. The oil-less design makes them ideal for pond aeration systems. Available in 1/4, 1/2, 3/4 and 2 hp models, Stratus™ SRC Series Compressors are assembled in the USA.

Features

- Universal dual voltage, 1725 RPM (60Hz) motor
- Oil-less operation
- Permanently lubricated bearings
- Includes **Stratus™ Smart-Start** technology to start under load
- Superior quality, flexible cup material for increased reliability
- Die-cast body components for overall strength
- Single or double cylinder design
- Inlet/Outlet Size:
1/4 hp - 3/4 hp: 1/4" fpt
2 hp: 3/8" fpt
- Maximum psi:
1/4 hp - 3/4 hp: max 30 psi
2 hp: max 125 psi

Units include

- Air inlet filter
- Rubber feet
- 5' power cord

See our cabinet options on pages 56-58

**2 Year
Warranty**

All Stratus SRC compressors operate under 70dB.
(About the volume of normal conversation)
And they're even quieter when mounted in cabinets!

ERP Air Filters & Element

ERPF12E

ERPF2

ERPF1 & ERPF2 Filter Features

- Good for sound reductions of 2 to 4 dB
- For compressor units up to 7.5 cfm
- Provide excellent filtration in areas of fine dust
- Connections: 1/4" mpt on ERPF1 and 3/8" mpt on ERPF2

Part #	Fits Compressor	Stocking Code	List Price
ERPF1	Filter - 1/4 & 1/2 hp for ERP25/50	624741	\$32.99
ERPF2	Filter - 3/4 hp for ERP75	924744	\$32.99
ERPF12E	Filter element for F1/F2	19748	\$12.99

See page 47 for valved outlets, pressure gauges and relief valves

Rotary Vane Compressors

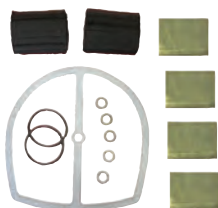

- Long lasting, continuous duty compressors offer less depth capabilities than the diaphragm or rocking piston compressors but produce considerably more air per hp
- Medium pressure, oil free compressors are excellent for pond and lake aeration or de-icing
- Carbon vanes self adjust to maintain maximum efficiency and are easily replaced when worn out
- All models have an 18' maximum operating depth,
- Units include air filter and 6' power cord with plug
- Air outlet assemblies are available (see page 47) with two to six valves, allowing one pump to supply up to six air manifolds
- Units available in 115 or 230 volt
- One year warranty

Rotary Vane Compressor Parts & Accessories

Vane Kits for RV33 - 100 Compressors

Rotary vane compressors each have four self-wearing vanes, when worn they no longer catch air resulting in reduction of air flow.

- Kits include four vanes, gasket and two black, internal air filters
- Ship weight - 2 lbs.

Part #	Description	Stocking Code	List Price
RV33V	RV33 repair kit	7119244	\$158.99
RV75V	RV75 repair kit	3154496	\$205.99
RV100V	RV100 repair kit	6239992	\$319.99

Internal Air Filters

Rotary vane compressors have two internal air filters. Air filter elements are included in repair kits or can be purchased separately. Black plug that holds filter does not come in repair kit. All models use the same plugs and filters.

Part #	Description	Stocking Code	List Price
RVBF	Internal filter	35776	\$7.69
RVBP	Black plug	78474	\$11.29
RVBO	O-ring	93675	\$4.89

Air Filters & Filter Elements

Fits rotary vane compressors above

AC432 filter has ¾" female threaded inlet

Ship weight - 1 lb. each.

Part #	Description	Stocking Code	List Price
AC432	¾" fpt complete filter	634491	\$45.99
AC393	Replacement filter element	512594	\$16.79

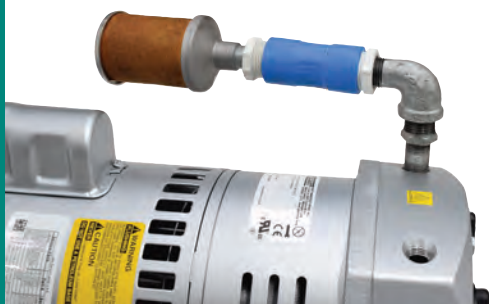

Check Valve for RV Compressors

Installs on the inlet side of the rotary vane compressors

- Installs between compressor and air filter (air filter not included)
- Prevents back flow of water in air lines
- Ship weight 1 lb.

Part #	Fits	Stocking Code	List Price
RVC	RV33	432241	\$42.99
RVC2	RV75, RV100	732243	\$42.99

Valved Outlet Air Assemblies

- Use when operating two or more pond diffusers from single pump
- Built-in pressure relief valve protects the pump if airlines become kinked, plugged or frozen
- Union coupling allows for quick and easy removal of the pump
- Air flow to each diffuser is controlled by adjustable ball valve

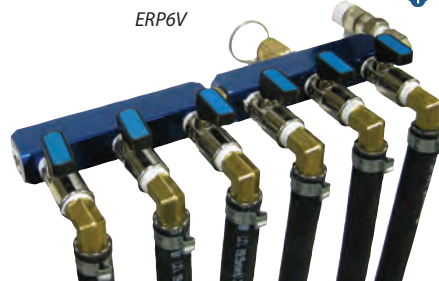

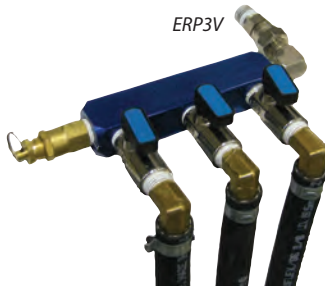

- 2' piece of flexible hose included on each line to dissipate heat and allow for easy tubing connection
- See remote valve assemblies on page 37 for applications where compressor is away from pond's edge

Rocking Piston Air Outlet Assemblies

- Includes pressure relief valve and swivel union for easy removal from compressor
- 1/4" threaded air inlets - fits all rocking piston compressors
- Set up for 3/8" tubing

Part #	Outlets	Stocking Code	Ship Weight	List Price
ERP1V*	1	126994	2 lbs.	\$35.99
ERP2V	2	779497	3 lbs.	\$105.99

ERP5V	5	5146991	9 lbs.	\$195.99
ERP6V	6	6164993	10 lbs.	\$219.99

*Control valve not included with ERP1V

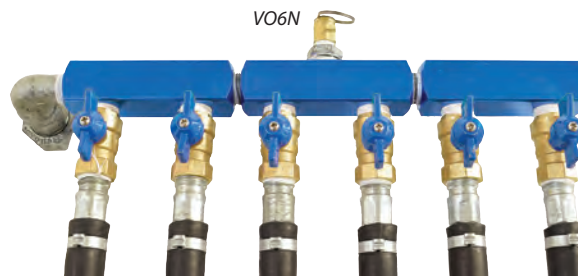

Rotary Vane Air Outlet Assemblies

- 1/4" threaded air inlets - for RV33 compressors
- 3/8" threaded air inlets - for RV75/RV100 compressors
- Set up for 1/2" tubing

Part #	Outlets	Stocking Code	Ship Weight	List Price
VO2N	2	7103493	4 lbs.	\$137.99
VO4N	4	6161248	6 lbs.	\$214.99
VO6N	6	7218992	8 lbs.	\$291.99

Liquid Filled Pressure Gauges

- Fits easily onto rocking piston valves or rotary vane outlets
- 1/4" mpt connection
- Use on aeration systems to monitor operating pressure and ensure compressor is not overloaded

Part #	Range	Stocking Code	Ship Weight	List Price
G30L	0-30 psi	417992	1 lb.	\$23.99
G50L	0-50 psi	819497	1 lb.	\$25.99

Pressure Relief Valves

- Protects your air compressor from excessive back pressure from frozen or kinked airlines, operating too deep, etc.
- 1/4" mpt

Available in

10 psi - Rotary vane compressors

25 psi - Stratus SRC rocking piston compressors

40 psi - Stratus ERP rocking piston compressors

Part #	Psi	Stocking Code	Ship Weight	List Price

PR40	40	911996	1 lb.	\$15.99

Regenerative Blowers

- The industry choice when high oxygen, low energy consumption and reliable service is needed
- Blowers have only one moving part – the impeller – and since the impeller touches nothing, there is no wear, no seals, no vibrations and no lubrication to be done
- 50 and 60 Hz operation, automatic thermal overload protection, UL approved and CSA certified, can be mounted in any position, lightweight, durable and compact
- Includes inlet air filter and outlet bleed valve
- 6' power cord on all blowers 1 hp and smaller

Larger and three phase blowers are available — please inquire!

GAST Diaphragm Compressors

Both the DC22 and DC12 come with a one year warranty
Brass barbed adapters included on both models for easy connection to 3/8" tubing

DC22

- Small, continuous duty diaphragm compressor is surprisingly powerful
- The 1/20 hp motor draws only one amp electric but operates up to 12' deep and produces .7 cfm air flow
- Permanently lubricated ball bearing motors designed for years of trouble free service

DC12

- Oil-less compressor works well for continuous pond aeration
- Higher pressure allows for aeration in ponds up to 35' deep
- Compressor comes with 6' power cord and inlet air filter

DC Diaphragm Compressor Parts & Accessories

DC22, DC12, Repair Kits

- If your air compressor runs but does not pump air after a couple years of service, chances are the diaphragm has cracked
- Kits include the diaphragm, head gasket and parts needed to rebuild compressor to "like new" performance
- Ship weight - 2 lbs.

Part #	Description	Stocking Code	List Price
RK22	DC22 (1/20 hp) repair kit	679497	\$105.99
DC12RK	DC12 (1/8 hp) repair kit	467496	\$89.99

Air Filters & Elements

Can also be used on a variety of other units as replacement air filters. Ship weight - 1 lb. each.

DC22F Air filter is one piece, no replaceable element available

ERPF1 is available as complete filter or element only (ERPF12E)

ERPF1

STRATUS KLCTM SERIES

KLC25

KLC40, KLC60 & KLC80

KLC100 & KLC120

Linear Diaphragm Air Compressors

These compressors combine outstanding performance with great value!

- Ultra quiet operation with very low energy usage
- Long life, even in continuous applications with minimal maintenance
- Operation at deeper than recommended depths will require more frequent replacement of diaphragms

3 Year Warranty

- Quiet, energy efficient, weather resistant and durable
- These compressors utilize a small piston instead of a diaphragm to pump air
- UL listed for outdoor use — ideal for pond aeration
- It is not at all uncommon for these motors to operate continuously for up to 8 years — a perfect choice for summer and winter aeration needs
- 5' power cord with 115 volt plug included
- A rubber elbow is included for outlet connection

Linear Aeration Kits

Need some Koi Loving Care?

Our best selling koi pond filtration for good reason - these kits are reliable, effective and affordable.

- Ensure adequate oxygen and circulation during hot summer months
- De-icing capability during freezing months
- Kits available for water gardens and koi ponds up to 30,000 gallons
- Quiet and energy efficient
- All kits include compressor with 6' power cord, rubber membrane diffuser(s), connectors and 3/8" QuickSink tubing

Deluxe Linear Aeration Kits

3 Year Warranty

- Extra Quiet — you can barely hear them from only 5' away
- Energy Efficient — operates for only pennies per day
- Very Reliable — motors can often run constant for up to 8 years
- Oil-less design — provides clean, dry air with minimal maintenance
- UL Listed — for outdoor use
- Each kit includes compressor, 15' of weighted airline and air diffuser

LA5W

Includes ML28 compressor, 15' of QuickSink weighted tubing and RAD6 air diffuser

LA10W

Includes ML45 compressor, 15' of QuickSink weighted tubing and RAD12 air diffuser

LA15W

Includes ML80 compressor, 15' of QuickSink weighted tubing and two RAD1250 air diffusers connected together

QuickSink Self-Weighted Diffusers

Same great membrane diffuser performance in a self-sinking design!

- Self-weighted base with powder coated finish
- Sch. 80 PVC air manifold check valve
- Includes inlet air fittings for $\frac{3}{8}$ ", $\frac{1}{2}$ " or $\frac{5}{8}$ " tubing; tubing clamps and strain relief
- Built in check valve prevents backflow of water up air line

**Snap Code
for Video**

DM4S

Improved membrane design!

- Enhanced durability
- Improved efficiency
- Lower maintenance

Membrane Diffusers

A great alternative to air stones in many aeration applications

- Hundreds of "I" slots that open as air pressure builds inside of the diffuser
- Center of the membrane does not have slots and acts as a check valve when air flow stops
- Diffusers have a 3/4" male thread inlet and are 10" in diameter
- Uniform bubble distribution with up to 3 cfm air flow

MD3

Bottom View
of MD3

Part #	Case Quantity	Stocking Code	Ship Weight	List Price
MD3	20	529998	2 lbs.	\$39.99

Rubber Membrane Air Diffusers

Incredibly strong. Ideal for pond aeration, circulation and destratifying applications

- Unlike air stones these diffusers are easy to clean
- In testing they produce a slightly larger air bubble than air stones which translates into less oxygen transfer into the water, so for fish holding tanks, raceways, fish production ponds, etc. we recommend staying with the air stones below
- Barbed inlets have multiple size barbs, simply cut to fit tubing
- Excellent for ponds and water gardens since they actually produce more circulation and water movement

6" weighted diffuser

Pro-Glass Alumina Air Stones

Alumina Air Stones – three times stronger than white silica air stones!

- Creates finer bubbles for increased aeration efficiency with no increase in pressure
- Inlet fittings are set into the body of the diffuser, making them much less likely to break or twist loose
- Higher density means self-weighting
- More resistant to ozone

The Best Choice
for aquaculture
applications!

EasyPro offers a variety of weatherproof enclosures to protect aeration compressors from the elements. Without protection the life of any air system will be greatly reduced.

Mock Rock™ Landscape Boulders

These Mock Rock™ Boulders are ideal for concealing air pumps, water pumps, pond filters, UVs, lighting transformers and other equipment.

- Commercial grade construction stands up to the elements, will not fade or crack, recycled material
- All rocks come standard with one vent, additional vents can be ordered if needed

Three Sizes

DMBR: Measures 19" long x 14" wide x 12" high, includes one 3" vent

DLB1: Measures 30" long x 23" wide x 18" high, includes one 3" vent

DLB2[†]: Measures 56" long x 42" wide x 30" high, includes one 4" vent

Roto-Molded Cabinets

This polyethylene cabinet is an economical alternative to the steel cabinets

Designed to hold air compressors up to the RV33 (1/4 hp rotary vane) in size. The small foot print makes it easy to hide!

- Ideal for housing all linear compressors, DC22 (PA10), DC12 (PA12), SRC25 (PA34), SRC50 (PA66) and RV33 (PA50)

- Roto-molded in a tan color which blends well into existing landscape
- Built in louvers allow fresh air into cabinet, an optional cooling fan is recommended for large compressors or in hot locations, fan comes installed in opposite hole with louver

SC18G	Ground mount cabinet with 115v fan	5329992	22 lbs.	\$439.99
SC18G2	Ground mount cabinet with 230v fan	7337496	22 lbs.	\$449.99
SC18SU	Sound proofing upgrade (installed)	857748	—	\$76.99

Lockable Steel Cabinets

Standard Cabinet

- 16½" w x 22" l x 19" t - will hold all compressors up to RV100 or multiple smaller units with stainless steel lock to protect against vandalism
- Includes compressor mounting base to keep compressor up off floor
- 14 gauge galvanized steel with powder coat paint finish
- Tapered lid - makes front wall shorter allowing easier access to compressor
- Has six 1¼" knockouts for airlines and one knockout for incoming power
- Optional fans recommended on any compressors operating in hot climates and on 3/4 hp and larger in all climates

SC22SU	Sound proofing for SC22 cabinet (installed)	789994	—	\$119.99

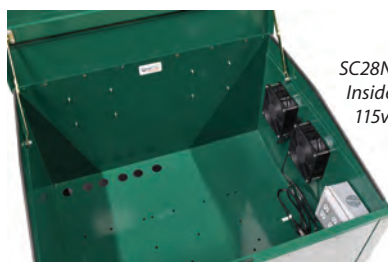

Large Lockable Steel Cabinets

Features

These larger cabinets are ideal for lake aeration projects where multiple compressors are used or for applications needing one compressor and a liquid dosing pump.

- 16 gauge galvanized steel with powder coat finish
- 24" w x 28" l x 20" t, includes two motor mounting plates
- Deluxe cabinets include electrical box and dual high volume cooling fan installed
- Locking hinges hold lid open during service and maintenance
- Order equipment pad for dusty applications (bottom air intake on cabinets) or soft/mucky sites to support the weight of the cabinet

Surface Aeration

EasyPro offers a wide variety of fountains and surface aerators. Our volume allows us to sell the best fountains at the lowest prices. A variety of patterns, sizes (ranging from 1/3 to 25 hp) and light packages for night time displays, assures we have a fountain for most every application. Shop and compare – we offer the best selection and lowest prices in the industry.

Surface fountains are a popular choice when decorative looks are desired. Golf courses, parks, office buildings and housing developments are all common places you see fountains used.

Many different spray patterns are available creating aesthetically pleasing looks while creating circulation and aeration. Since fountains float on the surface, circulation does not reach all the way to the bottom in deep applications which reduces their effectiveness.

Fountains create good water movement at the pond's surface and are helpful in keeping pollen, duckweed, watermeal and other surface debris under control.

Surface aeration is available in several styles ranging from high volume to highly decorative. Since water is heavy, the more decorative the spray pattern is the less volume of water is pumped. Here is a brief look at each style of surface aeration:

High Volume

These units focus on moving the maximum amount of water and not on decorative looks. Fish farms, waste water treatment ponds, retention ponds and other applications requiring maximum water movement with high oxygen transfer will benefit the most from this design. While not the prettiest to look at, these units are by far the best bang for the dollar when water quality management is needed.

Medium Volume

A modified version of the high volume units above, these fountains use a nozzle to guide the water into a "V" shaped display. Some volume is sacrificed to achieve the higher spray, but overall, decent water movement is produced. A good compromise between high volume and decorative units. These units are a good choice for ponds requiring water quality improvement but also a visually attractive display.

Decorative

For ponds requiring maximum visual appeal. Instead of a high volume propeller, decorative fountains use an impeller to build pressure and then force the water out through various nozzles to create a tall, visually appealing fountain. These units pump minimal water and create minimal circulation so they should be viewed as mostly decorative. Office buildings, condo associations, parks, zoos are the most common applications. We strongly recommend the use of a diffused aeration system in conjunction with a decorative fountain if water quality management is needed.

Finally the Perfect Fountain for Small Ponds!

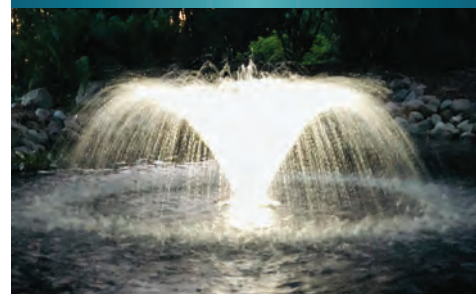

STARBURST MINI FLOATING POND FOUNTAIN

Designed for ponds as small as 15' in diameter and features built-in, super bright lights and super easy installation.

- Powered by an energy-efficient asynchronous mag drive pump
- Six super bright, cool white LED lights embedded in float
- Spray pattern: 2.5' tall x 6' diameter
- Float diameter: 15"
- Minimum required pond depth: 18"
- Wattage: Fountain 110 watts, Lights 5 watts
- 30' Cord
- One year limited warranty

AquaFountain™ 1/2 hp & 1 hp Fountains

Beautiful • Reliable • Affordable

Rocket Nozzle

Wide Umbrella Nozzle

Narrow Umbrella Nozzle

For over 25 years AquaFountains have proven themselves to be beautiful, reliable and affordable!

- Long lasting, energy efficient motor designed for continuous duty operation, with built in thermal and over current protection
- Floats are made from high density foam and protected by a decorative float cover
- Intake screens are aluminum and prevent leaves, algae, sticks, etc. from plugging pump
- 30" minimum operating depth
- 115v units come with timer and GFI; 230v units include timer only, purchase GFI locally
- Pre-assembled and ready to install

See pages 62-64 for AquaShine™ light kits that turn your fountain into a beautiful night time display

2 Year Warranty

Fountains include rocket and umbrella nozzles. Purchase narrow umbrella separately below.

GFI with timer included on all 115v models
230v units include timer only panel, without GFI

Kasco® 1/2 to 5 hp VFX Aerating Fountains

These Kasco fountains combine decorative good looks along with high oxygen transfer, making them the perfect choice for surface aeration. Kasco fountains are easy to install and energy efficient.

- Outstanding oxygen transfer rates, aesthetically pleasing patterns and low overall operating costs — each unit is fully self contained and floats in place in your pond or lake
- They come complete with motor assembly, float, bottom screen, mooring ropes, power cord and control panel (includes a weatherproof enclosure, GFI protection, a timer for fountain and a photo eye for lights)
- New one piece float on 2 & 5 hp fountains

Kasco AquatiClear

Aquaticlear is a water circulator, reimagined!
This clog-resistant circulator produces continuous water movement to keep docks, marinas, canals, shorelines and other areas free from algae, floating debris and foul odors.

- Unique designs allows floating debris to slip off the guard rather than wrap around the motor shaft or prop
- Easily mount with Horizontal Float Kit or Dock Mount Kit
- 50' power cord standard. Longer cord lengths available.
- Two year warranty

Kasco De-icer Water Agitators

Prevent costly ice damage!

Kasco de-icers are designed to prevent the formation of damaging ice around docks and boats. Thousands of these units are being used in marinas, harbors, waterfront developments and recreational ponds to prevent costly ice damage. De-icers come complete with power cord and two 20' suspension ropes.

Time and temperature control – save money in reduced electrical usage!

The controller (C20), designed exclusively for Kasco, will only operate when both the timer and thermostat are activated, unlike regular timers which run the motor every day at a set time. This controller will only operate when the temperature requires it. A temperature only controller (C10) is available that operates motor whenever freezing conditions exist.

Kasco de-icers can be used with the optional flotation kits (KFK) to create horizontal circulation. These circulators are excellent for de-icing applications but also have proven very effective for summertime use in preventing stagnant water.

Used in marinas, bays or lake coves, irregular shaped ponds and other similar applications; these circulators are a cost effective way to improve water quality.

A 1/2 hp circulator can effectively circulate water in a one acre pond twelve feet deep. Circulators are an ideal choice for shallow bodies of water where diffused air systems do not work.

Ideal for fresh or saltwater use

25' power cords standard on 115v de-icers and circulators.

230v units have 50' cord.

Longer cords available.

scott aerator AquaSweep Muck Blaster

Move algae, debris, muck, and silt with Aquasweep!

Improve water quality while safely removing sediment buildup. AquaSweep products can keep your waterfront, dock area or canal clean from algae, trash and decaying surface debris, and forcefully blast muck, silt and decaying leaves off the bottom. AquaSweep has been the top debris and muck mover in the industry since it launched back in 1994!

- Fully adjusts in any direction — ideal for eliminating problems above and below the water.
- Manually adjust in any direction or use with optional oscillator (below)
- High-velocity water propulsion pushes debris away from swimming areas, docks or boat lifts.
- 50' long cord with a rugged, marine-grade, water-resistant plug (longer lengths available)
- Includes dock mount plate, pole & yoke assembly. Designed to reach depths up to 7'
- Saltwater compatible
- Unconditional 5-year motor warranty

Amherst Fountain

Add beauty to your water feature while contributing to a healthy aquatic environment through oxygen transfer and water circulation.

- Classic, stately spray pattern provides a very distinct separation of all three tiers, capped by an impressive column reaching heights of over 35 feet.
- Utilizes a stainless steel, oil-free submersible motor - environmentally friendly
- The Amherst Fountain is proudly manufactured in the USA and carries an unconditional, 5-year motor warranty.
- Designed to withstand subzero conditions without damage! No winterization is required.
- Includes 100 feet of submersible, 12-gauge cable. Longer lengths are also available.
- Approved for use in saltwater

Display Fountains

A great choice for ponds needing aeration and decorative looks!

- High quality, American made fountains will keep your water sparkling clean while providing healthy aeration
- Most environmentally friendly system on the market
- Large flow rate does a fantastic job moving unwanted debris off of the surface
- Oil free, stainless steel submersible motor
- Industry leading, five year motor warranty
- Designed for 24 hour continuous operation
- Salt water approved
- Easy to install
- Does not include timer or GFI, see GF13 on bottom of this page
- Designed to be left in water year-round - even in freezing climates

Triad Fountain Three fountains in one!

A spectacular focal point to your outdoor paradise while simultaneously vastly improving the health of your pond. Three distinct brass nozzles are included and all can be easily changed in minutes — no tools are required!

- Choose from the more traditional geyser style of the "Gusher" nozzle, or a more elegant, cascading pattern such as the "Cambridge" and "Skyward" nozzles.
- All three nozzles provide a dynamic, aesthetically pleasing addition to your pond or lakescape while also helping maintain water clarity and oxygen levels and promoting an overall healthy aquatic environment.
- Manufactured utilizing a stainless steel, oil-free, submersible motor and pump, making it the most environmentally friendly fountain on the market.
- Designed to withstand subzero conditions without damage! No winterization is required.
- Includes 100 feet of submersible, 12-gauge cable. Longer lengths are also available.
- Designed for use in fresh or salt water.

Palatial Display Solar Fountain

High quality direct drive solar fountains designed for shallow or smaller ponds (up to 1 acre) where you want the beauty of a fountain. With four included nozzles, you can pick which style suits your pond the best.

- Operates in as little as 24" of water
- Four nozzles included
- High output DC maintenance-free brushless water cooled motor
- 100' power cord included (up to 400' available)
- Super-efficient MaxEnergy™ solar controller includes with 4 bi-facial solar panels providing longer run times
- Turn-key system includes racking, panels, grounding clamp, mounting pole, debris screen, etc.
- The total panel array measure 130" W x 82" H.
- 2 year fountain warranty. 15 years on the solar panels

Turn-key system includes racking, panels, grounding clamp, mounting pole, debris screen, etc.

Aerify Aerating Solar Fountains

Perfect for shallow or remote ponds where aeration is needed.

The Aerify Solar fountains are high quality, direct drive solar powered fountains designed for shallow or smaller ponds (up to one acre) where extra aeration is needed while still getting the visual benefits of a fountain.

- High output DC maintenance-free brushless water cooled motor
- Proprietary prop design to maximize GPM and oxygen transfer
- Operates in a minimum of 18" of water
- Pumps up to 500 GPM for optimal aeration
- 100' power cord included (up to 400' available)
- Super-efficient MaxEnergy™ solar controller includes 4 bi-facial solar panels providing longer run times
- Turn-key system includes racking, panels, grounding clamp, mounting pole, debris screen, etc.
- The total panel array measure 130" W x 82" H.
- 2 year warranty on fountain. 15 years on the solar panels.

• Super-efficient MaxEnergy™ solar controller included with 4 bi-facial solar panels providing longer run times while the proprietary prop design moves up to 500 gpm for optimal aeration!

Surface Aerators

Outdoor Water Solutions Surface Aerators do a great job in pond aeration, especially if your pond is 3-8' deep or heavily stocked with fish. Guaranteed to boil the water with its patented diffuser system and stainless steel water cooled motor. Also works great for remediation ponds, water treatment plants, lagoons, etc.

- Available in sizes from ½ hp up to 5 hp. Units up to 20 hp available with special order.
- Water cooled motor means no oil and no bearings to replace
- Suitable for use in salt water (Special order) or fresh water
- Styrene filled float for extra stability, superior to hollow floats
- Highest oxygen transfer rates available
- **Warranties: 2 years on the ½-1hp, three years on the 2-5 hp**
- 50' power cord included with the ½, ¾, 1 & 1.5hp models. Lengths up to 400' available
- ½ hp 110v has a GFCI. ½ hp 230v - 5 hp has an ELCI.
- Starter boxes included for 2 - 5+ hp in an outdoor rated enclosure.
- See pages 76-77 for fountain light options.

Note: All Outdoor Water Solutions units ship factory direct.

Ice-Away™ Pond and Dock De-Icer

Manufactured to run for years with minimal maintenance. There are no seals to replace, no oil to change as we only use high quality water-cooled motors.

- Patented motor mount/diffuser redirects water flow creating a larger coverage area vs. competitors
- Submersible motor is water cooled. No seals or bearings to fail. Longer life motor
- Designed to move 500 GPM with its higher 3,450 RPM motors
- Computer designed, high speed, foul resistant propeller
- (2) 10' sling ropes provided
- **Two-year warranty**

OWD150

OWDIPG
Optional Prop Guard protects from excess trash and debris

OWFK
Optional Float converts the pond de-icer into a surface aerator

The Ice-Away™ can cover a larger area of water than the 3/4 hp oil-filled de-icers when installed 10' deep. Customers have Ice-Aways that are still running after 20+ years of service.

Complete Fish Systems are ideal for classrooms, aquaponics, hydroponics, retail fish sales and more!

Excellent filtration is the key to any fish system, which is why we use EasyPro® Pressurized Bead Filters for the best in mechanical and biological filtration.

RCS2BL

The Fish System 1

This single tank set up requires less than 6' x 8' of space. Commonly used in retail stores and pond shops, but can also be found in many aquaculture classrooms.

System Includes:

- One PT6530 300 gallon fish tank - 65" diameter x 30" deep with pre-drilled drain holes for easy installation
- One EX3600 EasyPro® 3600 gph external pump. This whisper quiet, low-RPM pump is also energy efficient at only 1.4 amps
- One PBF1800 EasyPro® Bead Filter rated for up to 60 pounds of fish. Add the optional backflush blower to make your routine cleaning faster and use less water.
- Includes all necessary fittings, valves, unions, pipe, etc.

System 1

Best Seller!

RCS3N

The Fish System 2

Dual 300 gallon tanks allow you to keep different species or sizes of fish in the same system. A best selling system due to its increased capacity with minimal additional cost to a single tank setup.

System Includes:

- Two PT6530 300 gallon fish tanks - each is 65" diameter x 30" deep with pre-drilled drain holes for easy installation
- One EX4500 EasyPro® 4500 gph external pump. This whisper quiet, low-RPM pump is also energy efficient at only 2.7 amps
- One PBF3600 EasyPro® Bead Filter rated for up to 150 lbs. of fish. Add the optional backflush blower to make your routine cleaning faster and use less water.
- Includes all necessary fittings, valves, unions, pipe, etc.

DuraLiner™ 45 & 60 Mil EPDM Liner

SINCE 1970

High quality 45 and 60 mil EPDM liner & accessories with the manufacturing capacity 100% focused on the Pond Market - not the roofing market. Manufacturing is done in an ISO9001 certified factory and all ASTM testing is done to ensure equal or superior quality to existing brands.

DURALINER™ POND LINING

The trusted choice of professional landscapers, nurseries, koi pond and water garden installers!

- Easy to shape and form! Stays flexible even in extreme temperatures from -40° to 175°F.
- Weather and UV resistant - will not crack with age.
- Puncture resistant
- Fish and plant friendly
- More consistent throughout the roll & width does not contain the imperfections & blisters like other brands
- Available in pre-cut sizes, custom cut for your project, and by the roll for larger ponds
- 20 year limited warranty

SINCE 1970

EasyWeave Liner

Mid Michigan Ponds (MI)

Greenline Inc. (MI)

EasyWeave Reinforced Woven Polyethylene Pond Liners

Ideal for lining large ponds — up to 75,000 square feet in one piece and custom made to your pond size

These EasyWeave polyethylene liners are engineered to offer great strength in a light weight liner material. The material is UV stabilized to offer years of worry free protection against the damaging rays of the sun. Unlike regular multi-layered liners which simply stack the layers of liner on top of each other, these liners are woven together — this gives the ultimate in strength. Because of the light weight and strength, these liners can be manufactured in sizes up to 75,000 square feet.

Features

- Designed for easy installation and long life span
- Puncture, abrasion and chemically resistant construction
- High strength HDPE woven core that provides superior dimensional stability
- Outstanding UV, ozone and oxidation resistance
- Unlike standard PVC liners, which need 12" of soil over the entire liner, these liners do not require coverage other than around the edges — this lowers the overall installation cost dramatically!
- Custom made liners require approximately 10-14 days for manufacturing and delivery

45 and 60 mil EPDM Pond Liner and PVC Liners are also available.

See our Pond & Water Feature Catalog for additional liner options.

20 year warranty when under water, 10 year warranty when exposed to direct sunlight

Pipe boots are available for sealing around incoming lines below water, contact us for details

Liner Panel Size Parameters

Width: 12' width increment standard, 6' increment width available for additional \$150.00 • Length: Any desired length in 1' increments up to 300' long

See our website for video installations

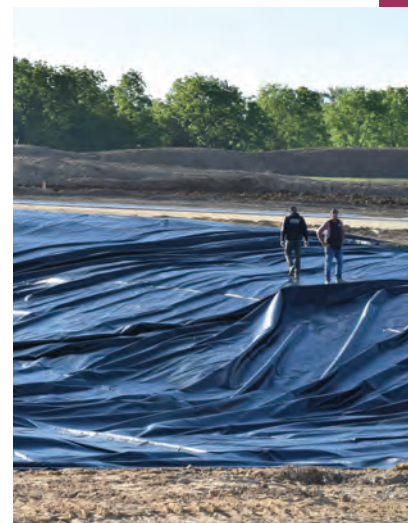

of liner, spec sheets, training and design tips

Applications

- Aquaculture
- Pond liner
- Soil remediation
- Exposed applications
- Oil and gas
- Irrigation reservoirs and canals
- Water management
- Hydroponic farming
- Fracking

Underliner Vent System

Helps to prevent uplifting or floating of pond liners caused by methane gases in organic soils or high water tables

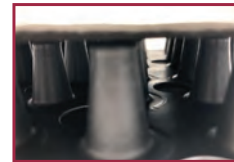

- Provides a strong, secure channel for ground water and gases to freely flow through to designated exits (GE4EO end outlets)
- Prefabricated 6" strip consisting of a molded grid wrapped in geotextile fabric to permit a high flow of water into the molded grid while restraining soil particles
- Easy to install — no heavy equipment or skilled labor needed — Simply roll out in the deepest portion of your pond
- Comes in 150' long rolls, is 6" wide and 1" tall

PREVENT THIS!

GE4EO
4" End Outlet

Ships from our warehouse — no minimum order!

Part #	Description	Stocking Code	Ship Weight	List Price
GE6150	Underliner Vent - 6"x150' roll	4338249	24 lbs.	\$409.99
GE4EO	4" End outlet	324258	3 lbs.	\$29.39

Liner Air Vent

- Use these 1 1/2" vents to release air or water trapped under pond liners
- Includes 1 1/2" bulkhead fitting and pressure relief fitting
- Helps prevent liner from floating up when air (or water) gets trapped underneath

Part #	Description	Stocking Code	Ship Weight	List Price
LAV	Liner air vent	144997	1 lb.	\$59.99

Fish Shipping Bags

- Most commonly used for hauling live fish
- Bags are made from the finest materials
- Our standard bag is 18" x 34", 3 mil and guaranteed waterproof
- Available in 100 or 250 count box

Save 5% on three or more boxes of OB250

Part #	Description	Stocking Code	Ship Weight	List Price
OB100	100 count box	855192	12 lbs.	\$73.59
OB250	250 count box	2122478	31 lbs.	\$163.29

Bander & Bands

Use this handy tool to quickly and securely close your fish shipping bags. For maximum holding power use two bands on each bag.

BBT	Bag sealing tool	431705	2 lbs.	\$45.29
BB	Bands, 100 per bag	75526	1 lb.	\$7.89

Game Fish Food

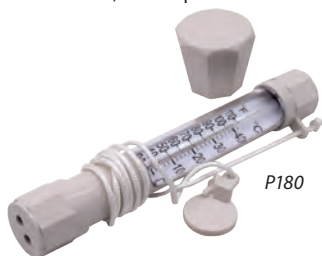

- High quality general purpose fish food designed for feeding trout, bluegill, catfish and other game fish in farm ponds and lakes
- Floating pellets available in 3.0 mm (1/8") for younger fish or 5.0 mm (3/16") for larger fish

Part #	Description	Stocking Code	Ship Weight	List Price
FD18	44 lb. bag 1/8"	841756	2 lbs.	\$54.99
FD316	44 lb. bag 3/16"	741750	6 lbs.	\$54.99

Pond & Water Garden Thermometer

- Can be used as a floating thermometer (with cap on) or sinking (with cap off)
- Made from ABS plastic and shatterproof lens, reads in both F° and C°
- 3' cord included, twelve per case

P180

Koi Medic Salinity Meter

- Very accurate, easy to use salinity meter
- Simply turn on and dip into pond, LCD will display salt content
- Includes protective case
- Auto shutoff, drop shock 6', 150 hour battery life, water resistant, low battery warning, 0.00 - 1.00% range 0.01 resolution, includes four 1.5v button cell batteries

KMS

Eco pH+ Tester

- This simple to use tester gives fast, accurate pH readings, is water resistant and floats if dropped in pond
- Controlling pH levels will help balance water chemistry, enhance fish colors, promote spawning and control CO2 level
- Includes protective case
- Auto shutoff, drop shock, 150 hour battery life, water resistant, low battery warning

KPH

Four 1.5v button cell batteries included

L363302	9 Test Kit	4334557	6 lbs.	\$393.59

YSI Meters

Economy Oxygen Meter

The YSI DO200 is designed for quick, accurate oxygen and temperature readings!

- Hand held and easy to use
- Watertight IP67 housing
- Automatic temperature compensation
- Manual salinity compensation
- Low battery indicator with 500 hour battery life
- Screw on cap membranes with low stirring, fast response probe
- Choose a 12' (4 meter) or 30' (10 meter) cable, order separately

Part #	Description	Stocking Code	Ship Weight	List Price

Customer Service

Technical Assistance 2024 marked our 54th year in the aquatics business. We feel it is better to spend time helping you properly select products now rather than spend time with you later helping to solve the problems (and expense) of incorrect products! You are welcome to contact us for free design assistance on pond, waterfall, aeration, filtration, etc. Whenever possible, please send us a diagram of your layout to provide us a visual reference. Fax your diagram to 231-834-5537 or email to quotes@easypro.com.

Large Orders If you are in need of a large quantity of an item (or items), please provide us a list of items and quantities needed so we can quote you prices.

Ordering

- **Phone Orders** — Call 952-476-ALTA or 866-920-ALTA
- **Fax In Order Form** — Whenever possible, please fill out the order form and fax your order in. This is the most accurate way to place orders and gives a written record in case an error occurs. We cannot be responsible for accuracy of orders that are phoned in. Our fax number is 952-473-2846
- **Email Orders** — Email your orders to sales@altafalls.com

Shipping Information

Delivery Van — Our delivery van travels locally at a flat rate fee. Please contact your sales representative for delivery area and fees.

Items Less Than 150 Pounds — These items usually ship Spee-Dee. If you are out of the Spee-Dee delivery area they will ship UPS. Some items are shipped without a box. Both companies charge based on weight and dimension.

Large and/or Heavy items are Shipped Motor Freight — The vast majority of our freight is shipped with Spee-Dee LTL. If you are out of the Spee-Dee delivery area we do work with other truck lines to insure quick delivery. Motor freight companies charge a residential fee when delivering to a residence.

Damaged Shipments — Please inspect your shipment before signing for it! Once you sign for it, the carrier will not be liable for shortages or damage. You can refuse a damaged shipment or accept it with clear notification of damage on the bill of lading. Please call us immediately if a damaged order is refused so we can accept it back from the carrier and reship your order.

Returns All returns must have an RA# (Return Authorization Number). This lets us know what is coming back and what to do with it (i.e. credit your account, replace product, etc.). A 10% restock fee will apply to returns unless it is our shipment error. Packages sent to us without an RA# written on them will be refused! All products, including warranty items, must be returned to us shipping prepaid. We will pay the shipping charges on warranty items back to you, but not from you to us. Product over 90 days old is not returnable for credit. Special orders, cut liner and used items are not returnable.

Payment Options

Credit Cards — We accept VISA, MasterCard and Discover

Money Orders/Checks — Money orders or business checks are accepted as payment.

C.O.D. — Orders shipping from our inventory can ship C.O.D. UPS charges \$9.00 per package for this service. Motor freight orders can ship C.O.D. but freight lines charge 3% of order value (minimum charge is \$40.00) to handle this. Orders not shipping from our inventory cannot ship C.O.D.

Net 30 Account — Companies wishing to set up an account with us need to fill out our credit application. Schools, institutions and governmental agencies are pre-approved with use of a purchase order number. Interest will accrue on all invoices over 30 days. No orders will be shipped to customers with invoices over 60 days old until account is brought current.

Hours Business Hours Monday through Friday, 8:00 a.m. to 5:00 p.m. EST **Sales, marketing, shipping and office closed Saturdays and Sundays.**

We will be closed for the following 2024 holidays

Good Friday — Friday, April 18

Memorial Day — Saturday, May 24 and Monday, May 26

Independence Day (US) — Friday, July 4

Labor Day — Saturday, August 30 and Monday, September 1

Thanksgiving (US) - Thursday, November 27 and Friday, November 28

Christmas - Wednesday, December 24 through Thursday, January 1

Warranty Alta Falls and EasyPro honor all manufacturers' warranties. Each manufacturer has their own warranty procedure. Some manufacturers allow us to determine warranty for them, while others handle their own warranties. Submersible pumps that have been run out of water, have been altered or have cuts to the power cord will not be covered by warranty. Also, any product not used for its intended purpose, altered, damaged, improperly maintained or neglected will not be covered. Submersible pumps cannot be taken apart, this voids warranty. Shipping costs to us (or to the manufacturer) are not covered by warranty, please insure package when shipping back to us. If product is covered by warranty we will pay shipping costs to ship new/repaired item back to you. Product returned to us for warranty that is deemed in working condition will be shipped back to you at your expense. Be sure your electrical supply is proper before returning pumps to us — each year we get numerous returns that are in good working order only to find the problem was in the electrical supply! A bench fee of \$25.00 will be charged for each pump returned to us that is not broken. Each year we test hundreds of pumps, many of which are fine. This fee covers time and materials used in testing pumps that are in good working order.

A policy of continuous improvement is our goal, therefore products may change from these shown. All prices are subject to change without notice. We make every effort to maintain printed prices however, due to circumstances out of our control, they may change.

Two Specialized Catalogs!

We're proud to offer the largest selection of products in the industry. Whether a small water feature or a large lake, we have products for nearly every application.

We know your time is valuable. So you can focus on the products you need, we publish two catalogs.

- **The Pond & Water Feature catalog** contains products and information on ornamental ponds and water features.
- **The Lake & Pond Management catalog** contains all of our water treatments, fountains, aeration systems and aquaculture supplies.

Please contact us via phone or website to view or request copies of our catalogs!
