

**BIGGER
THAN ANY GRILL**

**BURN
OUT.**

**MORE COMPACT
THAN ANY OUTDOOR KITCHEN**

**MORE AFFORDABLE
THAN YOU THINK**

BBQ BLOCK

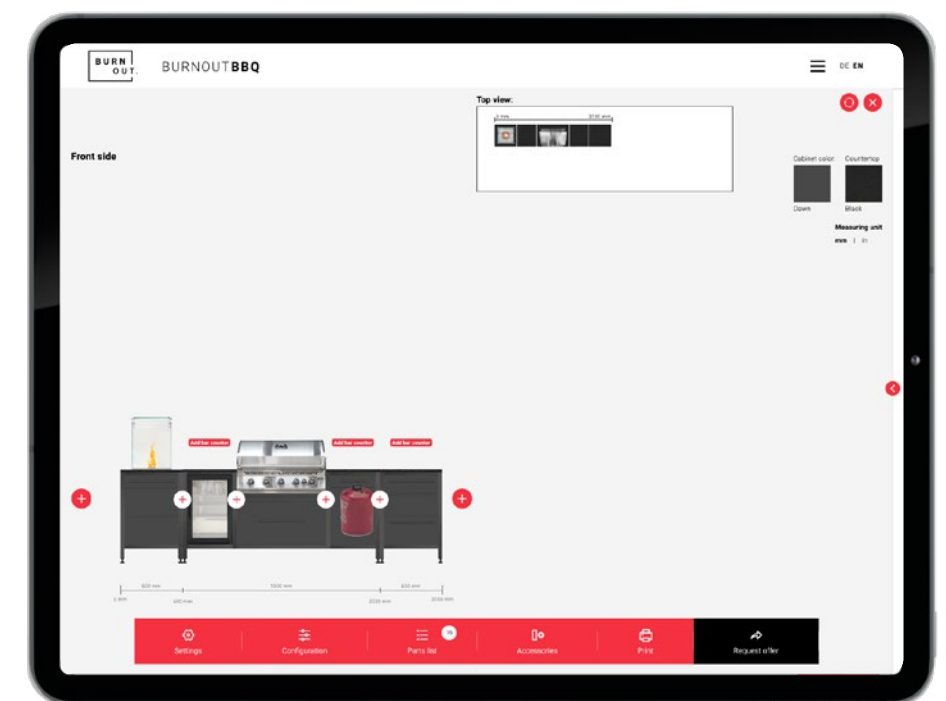

AT THE GOAL. AT THE GRILL. IN JUST 3 STEPS.

The size? It's always the same. Just like the outstanding quality, the sophisticated system, the perfect components. But otherwise? The choice is yours. What colour should it be? How about more storage space, room for your gas bottle? Or would you perhaps prefer a built-in fridge for cool drinks right at the grill? And the options don't stop at the grill. Ceramic or gas? Everything is possible. And to top it off? A cool, freshly tapped beer. Straight from the tap integrated into your BLOCK outdoor kitchen.

YEARS OF EXPERIENCE..

We've been crafting outdoor kitchens for many years – long before it became a trend, back when huge grills only offered tiny work surfaces. Our BURNOUT kitchens are modular and can be expanded and upgraded even years after purchase. Amazingly, this also applies to our BBQ BLOCK. Need more space? Then place a second BLOCK next to your old one – without a grill, but with even more storage space. Are you a multitasker? Then simply order a second BLOCK, position it at an angle, and enjoy an outdoor kitchen that's as individual, generously proportioned and versatile as it gets. And – to save the best for last: as part of the large BURNOUT BBQ family, the BLOCK can easily be combined and expanded with all BBQ modules. Fast, easy and hassle-free. Just try out our configurator and discover all the possibilities that our BBQ BLOCK has to offer you.

PUT TOGETHER JUST THE GRILL YOU NEED.

You want maximum flexibility? Then put your BBQ BLOCK on wheels. Of course, we also have feet. And lots of body and frame colours. And two worktop variants. Everything we are showing you here is just a small selection of a huge range of options.

1

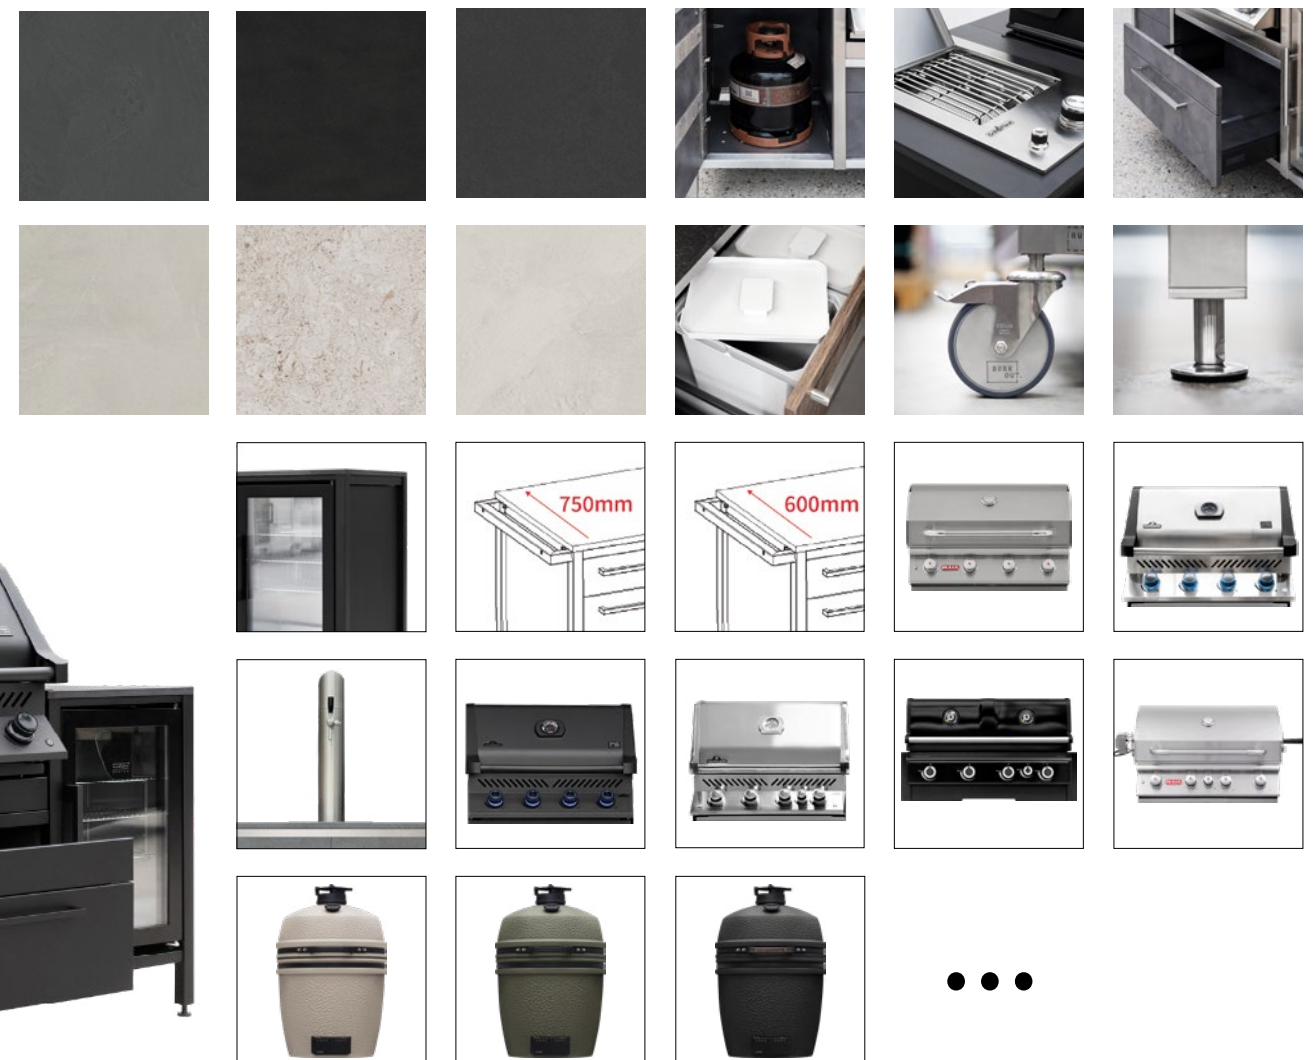

To begin with the essentials: Which grill would you like? Gas, coal, small, large? You decide. Right from the start.

2

What's on the left side of your new BBQ BLOCK? Everything is possible – whether it's a door, drawer or refrigerator.

3

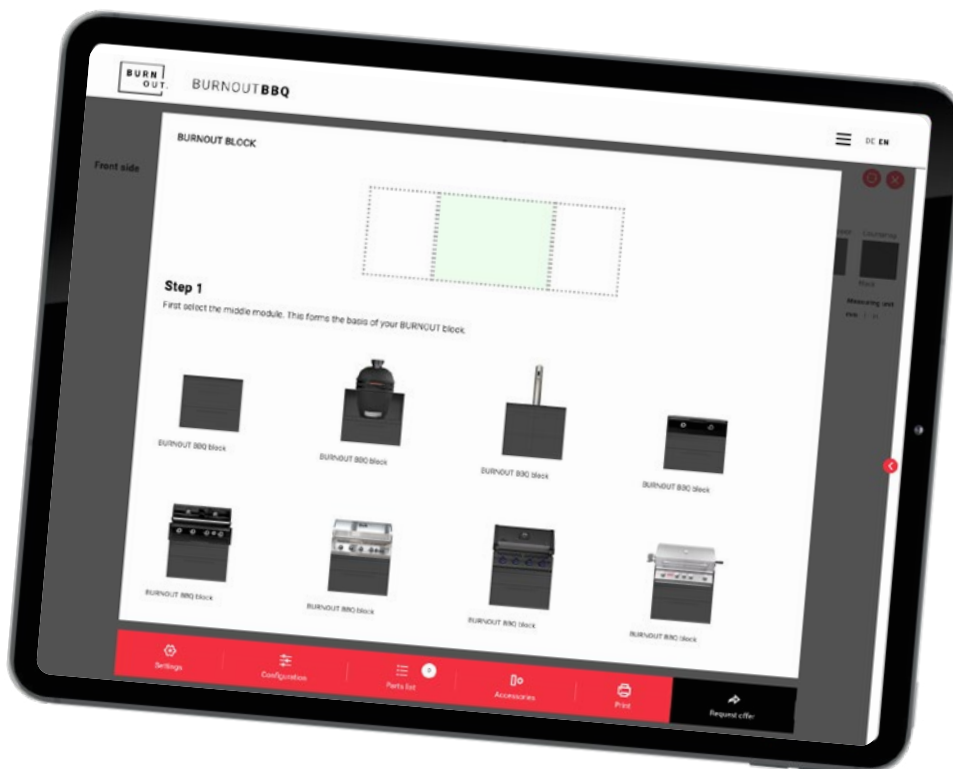

And on the right? Here, too, you have free rein. Do you like to grill with gas? Then use the space for your gas bottle. Or would you prefer drawers? A sink? Maybe even a beer tap? Everything is doable – and, above all: selectable!
